What's New in This Release

Key Features

There are no key features in Composer v9.0.

Implemented Feature Requests

There are no implemented feature requests in Composer v9.0.

Installation

Requirements

Composer v9.0 can run on the following operating systems:

- OS X v10.5.x
- OS X v10.6.x
- OS X v10.7.x
- OS X v10.8.x

Upgrading Composer

To upgrade Composer, simply replace it with the most current version.

It is also recommended that you open Composer's Preference window and verify the new Exclusion List.

Bug Fixes and Enhancements

The following defects are fixed in v9.0:

- [D-004047] Fixed an issue that caused Composer to crash when adding a package source with the same name as a package source that was recently deleted.
- [D-004393] Fixed an issue that caused character encoding issues with postflight scripts in Composer.
