Environment Types

	Shared Hosting Environment	Dedicated Hosting Environment
Size	< 500 devices	500+ devices
Minimum	35	500
Billing	Annual, with option for monthly	Annual

Purchasing Information

Hosting is priced based on the total number of devices that are managed—a sum of the iOS and OS X devices that are in the managed environment—and is separate from licensing and maintenance costs. Dedicated hosting has a one-time cost for instantiating the environment. The JumpStart is still a required part of any new customer purchase.
