

## Offer a personalized learning experience with Shared iPad and the Jamf Pro

### Infinite learning possibilities

---

The introduction of iPad was a significant leap forward in classroom technology for educators. In one sleek device, teachers and students gain direct and immediate access to a wealth of apps, books, and creative tools. With the advent of Shared iPad, this educational experience is available to even more classrooms.

Teachers use iPad to offer a more engaging and interactive learning experience to meet each student's individual needs. Combining the power of iPad with the Jamf Pro—mobile device management built for Apple devices—educators have the opportunity to:

- Meet students where they are at in their skill level by providing access to personalized learning resources
- Refocus student attention and shorten transitions by pausing student engagement on their iPad or guiding individuals or groups of students to a specific learning app
- Administer secure assessments and quizzes by locking student iPads into a testing app and restricting assistive technology such as spell check or dictionary
- Facilitate homework turn-in and student engagement through learning management systems like iTunes U, Moodle, or Edmodo
- Share student work by projecting a student's iPad to an Apple TV

## SHARED DEVICES OFFER INDIVIDUAL EXPERIENCES

If a 1:1 iPad deployment isn't the right choice for your school, Shared iPad offers the same educational benefits by delivering a personalized experience. With Shared iPad, schools can provide all students with access to valuable technology and tools that foster academic achievement. And, with the Jamf Pro, IT has the right tools for deployment, configuration, and security so your iPad initiative is a success.

**In addition to academic benefits, a Shared iPad deployment with the Jamf Pro:**

- Reduces the number of devices that need to be purchased
- Alleviates the concern of lost, stolen, or damaged devices as iPads are kept in the classroom
- Ensures student data privacy by utilizing iOS security features along with device configurations managed by IT
- Equips teachers with purpose-built tools for classroom management

## EDUCATIONAL APPS AND CONTENT READILY AVAILABLE

With the Jamf Pro, IT can prepare a set of Shared iPads and pre-load apps, content, and settings. Schools can discover and purchase education apps through Apple School Manager, using the Jamf Pro to deploy new apps as curriculum objectives change.

**With over 1.5 million apps in the App Store, educators have a plethora of resources to deliver a personalized learning experience. Some popular educational apps include:**

- **eSpark:** Curates the best available educational apps, bundling them in personalized learning plans for students so they are challenged while learning at a pace that is right for them
- **Socrative:** Provides teachers with the ability to administer quick assessments and receive instant feedback on student understanding
- **iTunes U:** Gives teachers a way to plan and deliver lessons, share feedback, and encourage conversations beyond the classroom

## IMPLEMENTING SHARED IPAD

With the robust capabilities of iPad, an equally robust mobile device management solution is essential for IT, teachers, and students to get the most out of their devices. Jamf Pro helps schools in the five key areas below:

### Prepare

Apple School Manager—the central portal for iPad in education—and Jamf Pro work together to:

- Enroll new devices for painless configuration and setup
- Purchase and deploy education apps for students and teachers
- Create Managed Apple IDs in bulk and assign customized roles for students, teachers, and staff
- Synchronize with your Student Information System to accurately reflect your current enrollment

### Configure

Jamf Pro offers an intuitive web-based console for IT admins to:

- Customize iPads with appropriate group settings for each class
- Establish security controls to ensure privacy and keep data safe
- Keep apps and iOS up-to-date with automatic patching
- Recover lost or stolen iPads by remotely locking the device and sending a custom message to the locked screen

### Purchase Apps & Books

Utilize Apple School Manager to purchase apps in bulk, then use the Jamf Pro to assign and install apps on groups of devices. Or, create your school's custom app catalog with the Jamf Pro to allow students to install school-approved apps and books on their own.

## Deploy

The Jamf Pro leverages Apple School Manager to set up and configure Shared iPad. Once logged in with their Managed Apple ID, students have their personalized view of apps and content. When finished, they simply log out and the iPad is ready for the next student. As class enrollments change, the Jamf Pro updates each iPad wirelessly so they're always ready for use.

## Manage

Use the Jamf Pro to continually push new learning apps to student devices and utilize the custom app catalog to further empower teachers and students with the latest educational materials.

## Conclusion

---

Technology is changing the way education is done within the walls of today's K-12 institutions. Apple products, managed through JAMF Software, give students the ability to learn at their own pace with engaging, multi-dimensional tools. This form of management provides educators with technology to customize the access to content and resources, plus helps manage the in-class experience and assessments with a reduced reliance on IT involvement.
