Everything you need to know about the Jamf Teacher App for Jamf School

What it can do, what information it has access to and how that helps you teach.

Your school has started handing out iPads managed by Jamf School. Would you like to use the new tool to modernize your classroom?
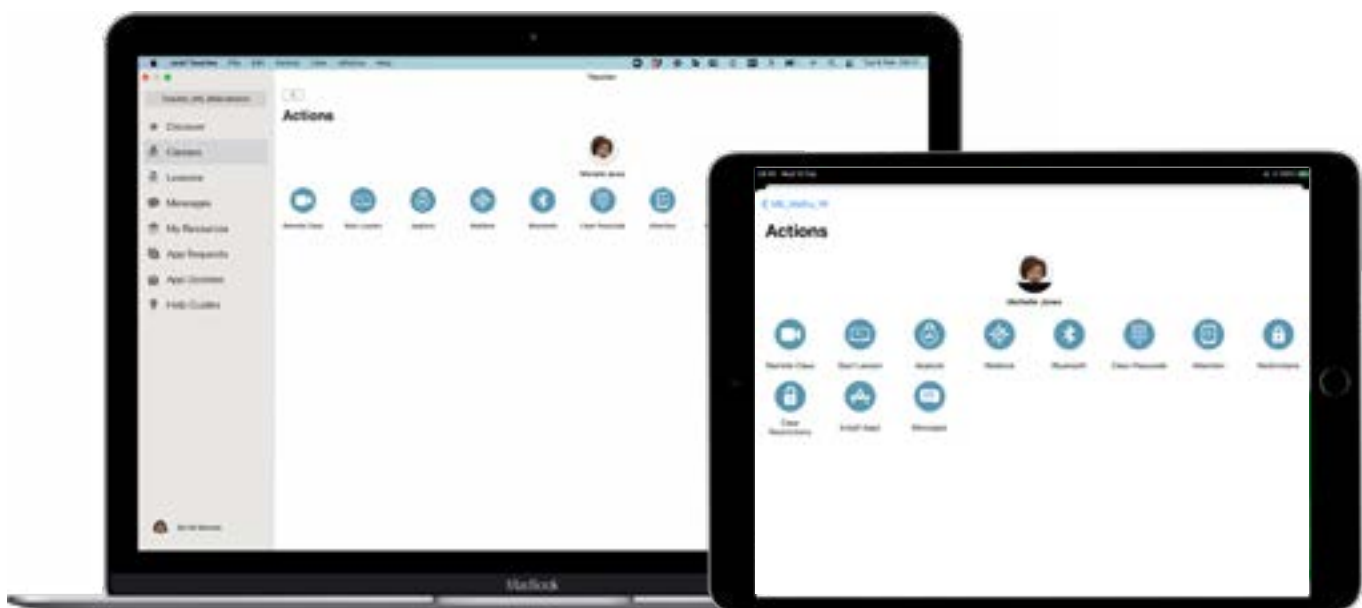

Here is everything you need to know to facilitate the digital learning process.

"I am a math teacher and with Jamf Teacher I can create lessons for each subject (and) enable the programs and web pages students needs for the lesson."
- Liudmila Khorolska, Math teacher, Liko-School

What is the Jamf Teacher App for Jamf School?

The Jamf Teacher app for Jamf School is a free app that teachers can use to manage student devices in the classroom in conjunction with the Jamf School Student app. It is available both as an iPad, iPhone and Mac app as well as a web application.

What can it do?

Depending on your school's settings, teachers can do the following using the Jamf Teacher app for Jamf School:

Create and manage classes

Send messages to students

Create and start lessons

Request apps for students

Share a lesson

Manage student devices

Invite students to a remote class

"It works very intuitively and has a splendid reputation for being reliable."
- Kees Versteeg, Principal, Griftland College

Getting Started

Once downloaded, there are two ways to log-in to the Jamf Teacher app for Jamf School:

1 Automatic login

You are automatically logged in to the jamf Teacher app for Jamf School on your school-managed mobile devices if that device is assigned to you.

2 Login using credentials

Enter the credentials provided by your school in the mobile or web application. Your school's IT department can give you the URL if you're using the web app.

What can my school's IT administrator see on my teacher device?

Jamf School stores inventory information for each managed mobile device that is owned by the school. The IT administrator can view the following information for each institutionally-owned mobile device:

- Hardware information*
- Installed apps
- Installed profiles

This includes UDID, serial number, Mac address, model, and capacity operating system information.

Where is Jamf School data stored?

Jamf Cloud uses servers in the United States, Germany, and Japan. Data at rest remains in the region that hosts the Jamf School instance. Jamf processes any personal data it receives through the App in accordance with applicable data privacy laws.

"The safety of children on the internet is important. Jamf School offers services to regulate access to the content on student devices."

- Yuriy Baglay, CIO, Liko-School
