Agenda

1 | Highlights

We have been busy behind the scenes working on some great innovations to make life as an Jamf Admin as effortless as possible.

2 | Day in the life...

Let us take you on a journey through all the cool things we have been creating for you

3 | Resources

All the tools and documentation you need to bring these advancements into your environment.

We have been busy...

macOS LAPS

macOS Onboarding

- ▶ Apple Watch paired with a supervised iPhone enrolled with Jamf Pro
- ▶ Declarative Device Management
- ▶ Hands-free communication
- ▶ iOS 17+ and watchOS 10+

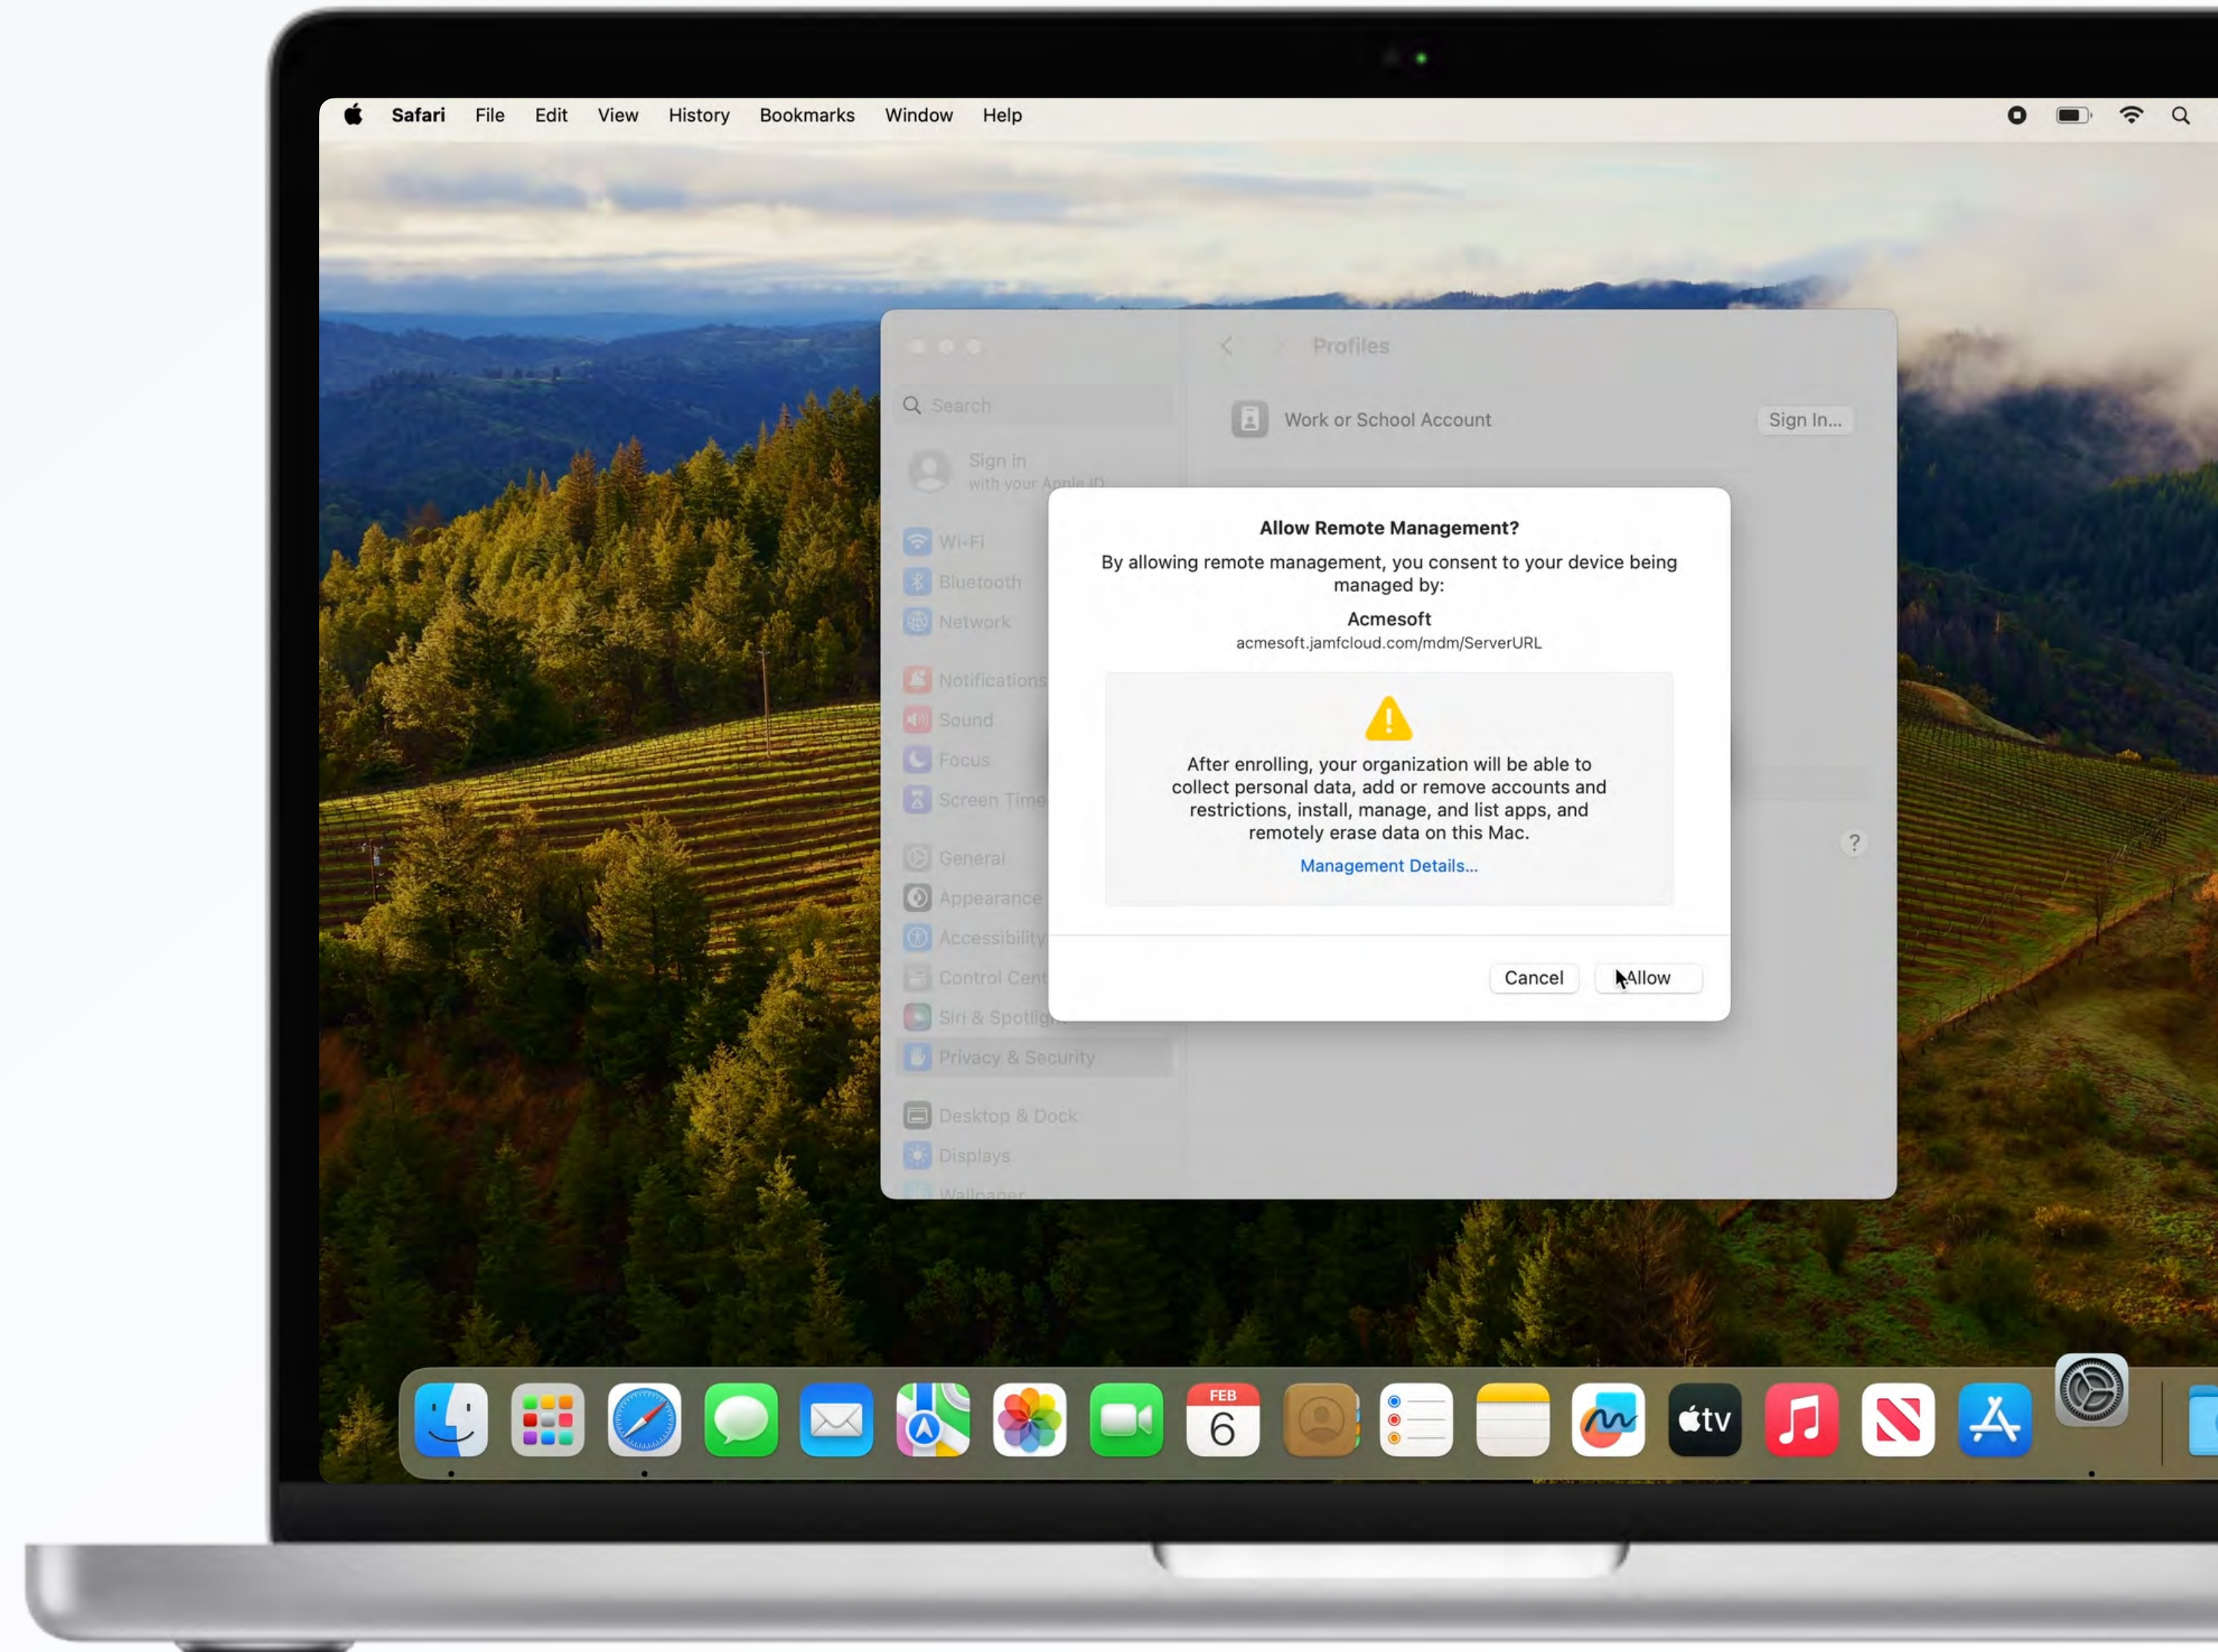

Day in the life of a... Jamf IT Admin

Account-Driven Device Enrolment

Released in March, 2024

- ▶ Creates a new, separate data volume for Managed Data and Apps.
- ▶ User-privacy for institutionally-owned devices where personal data is permitted.
- ▶ iOS and iPadOS 17+ supported in Jamf Pro 11.0.

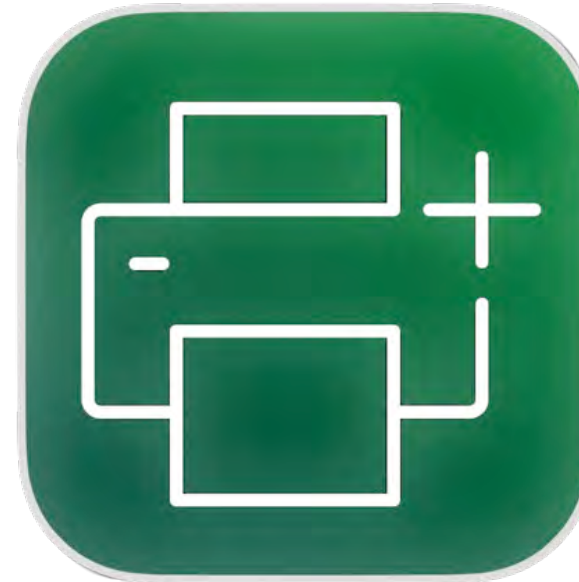

New Jamf Pro admin tools

Released in March, 2024

Jamf Sync

Jamf Sync automates your Jamf Pro distribution points synchronization.

Jamf Printer Manager

Quickly find printers and upload printer mappings to Jamf Pro.

Jamf Actions

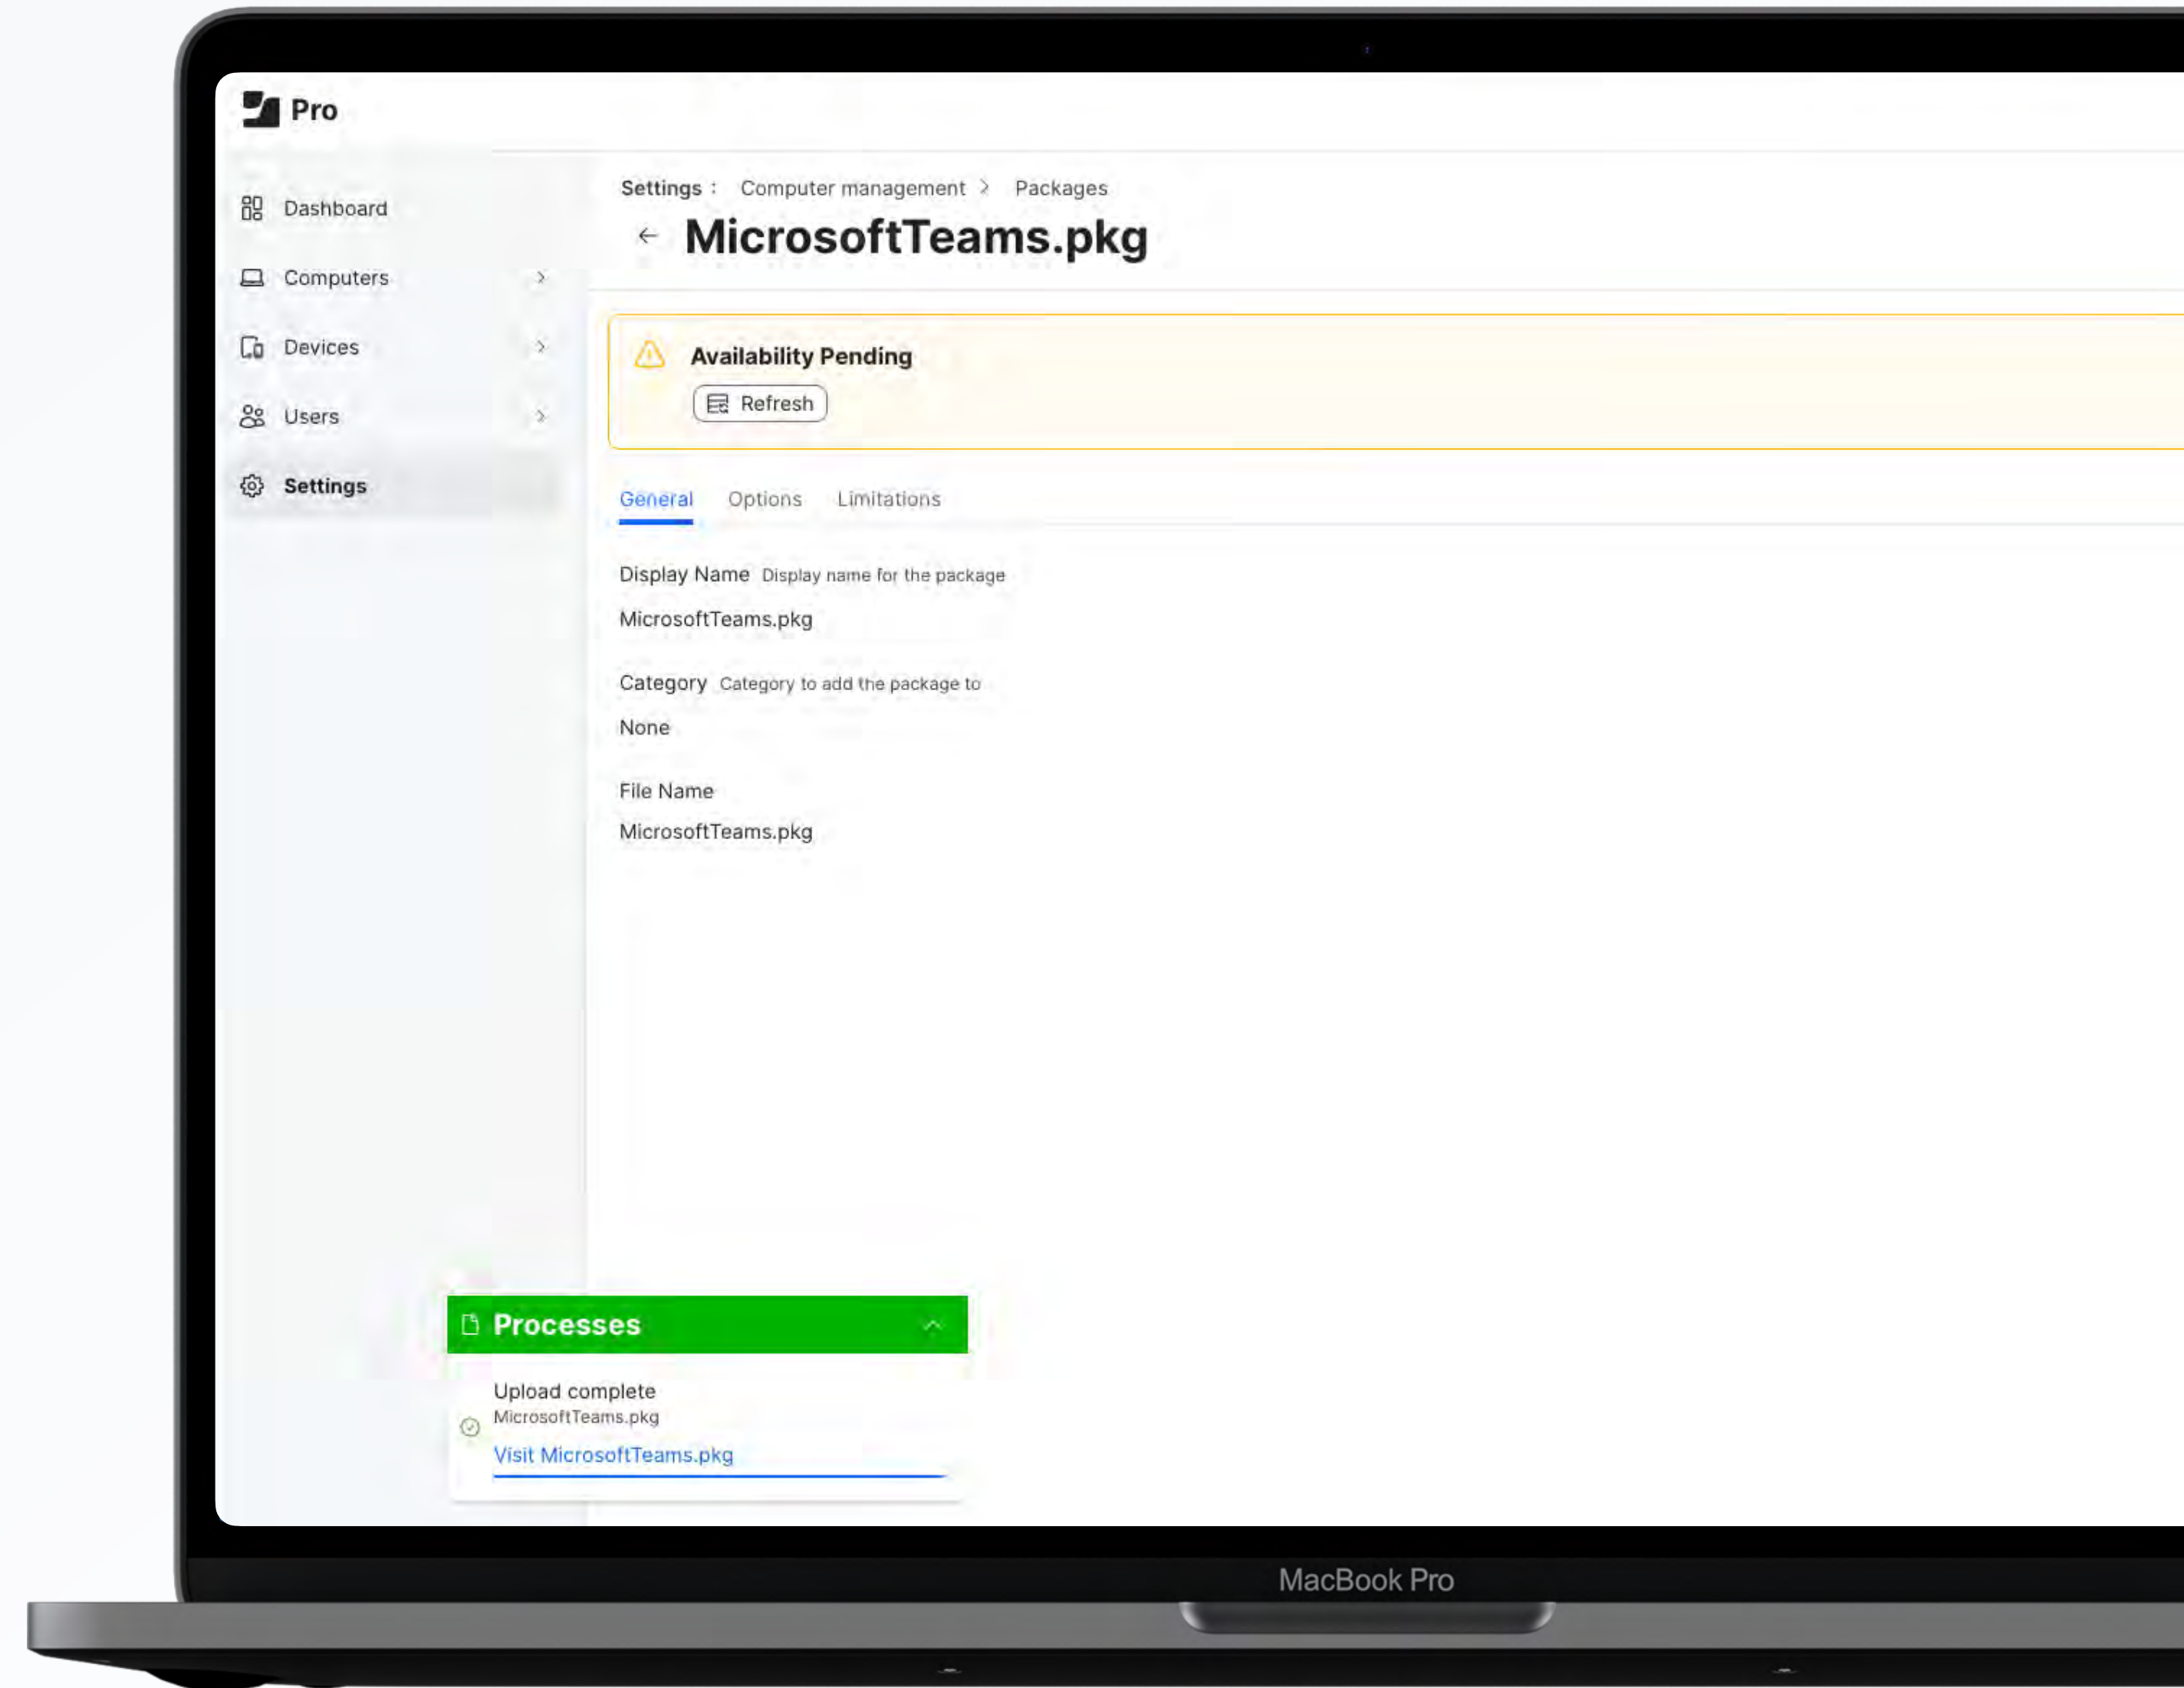

Integrates Jamf Pro API interactions with Apple Shortcuts on macOS.

Jamf Cloud Distribution Service 2.0

Released in February, 2024

IT admins have the ability to host files for distribution to iPhone, iPad, and Mac.

- ▶ Fully re-built with the latest AWS features.
- ▶ Add, Download, and Delete files programmatically via the Jamf Pro API.
- ▶ Improved performance and provides support for larger package uploads.

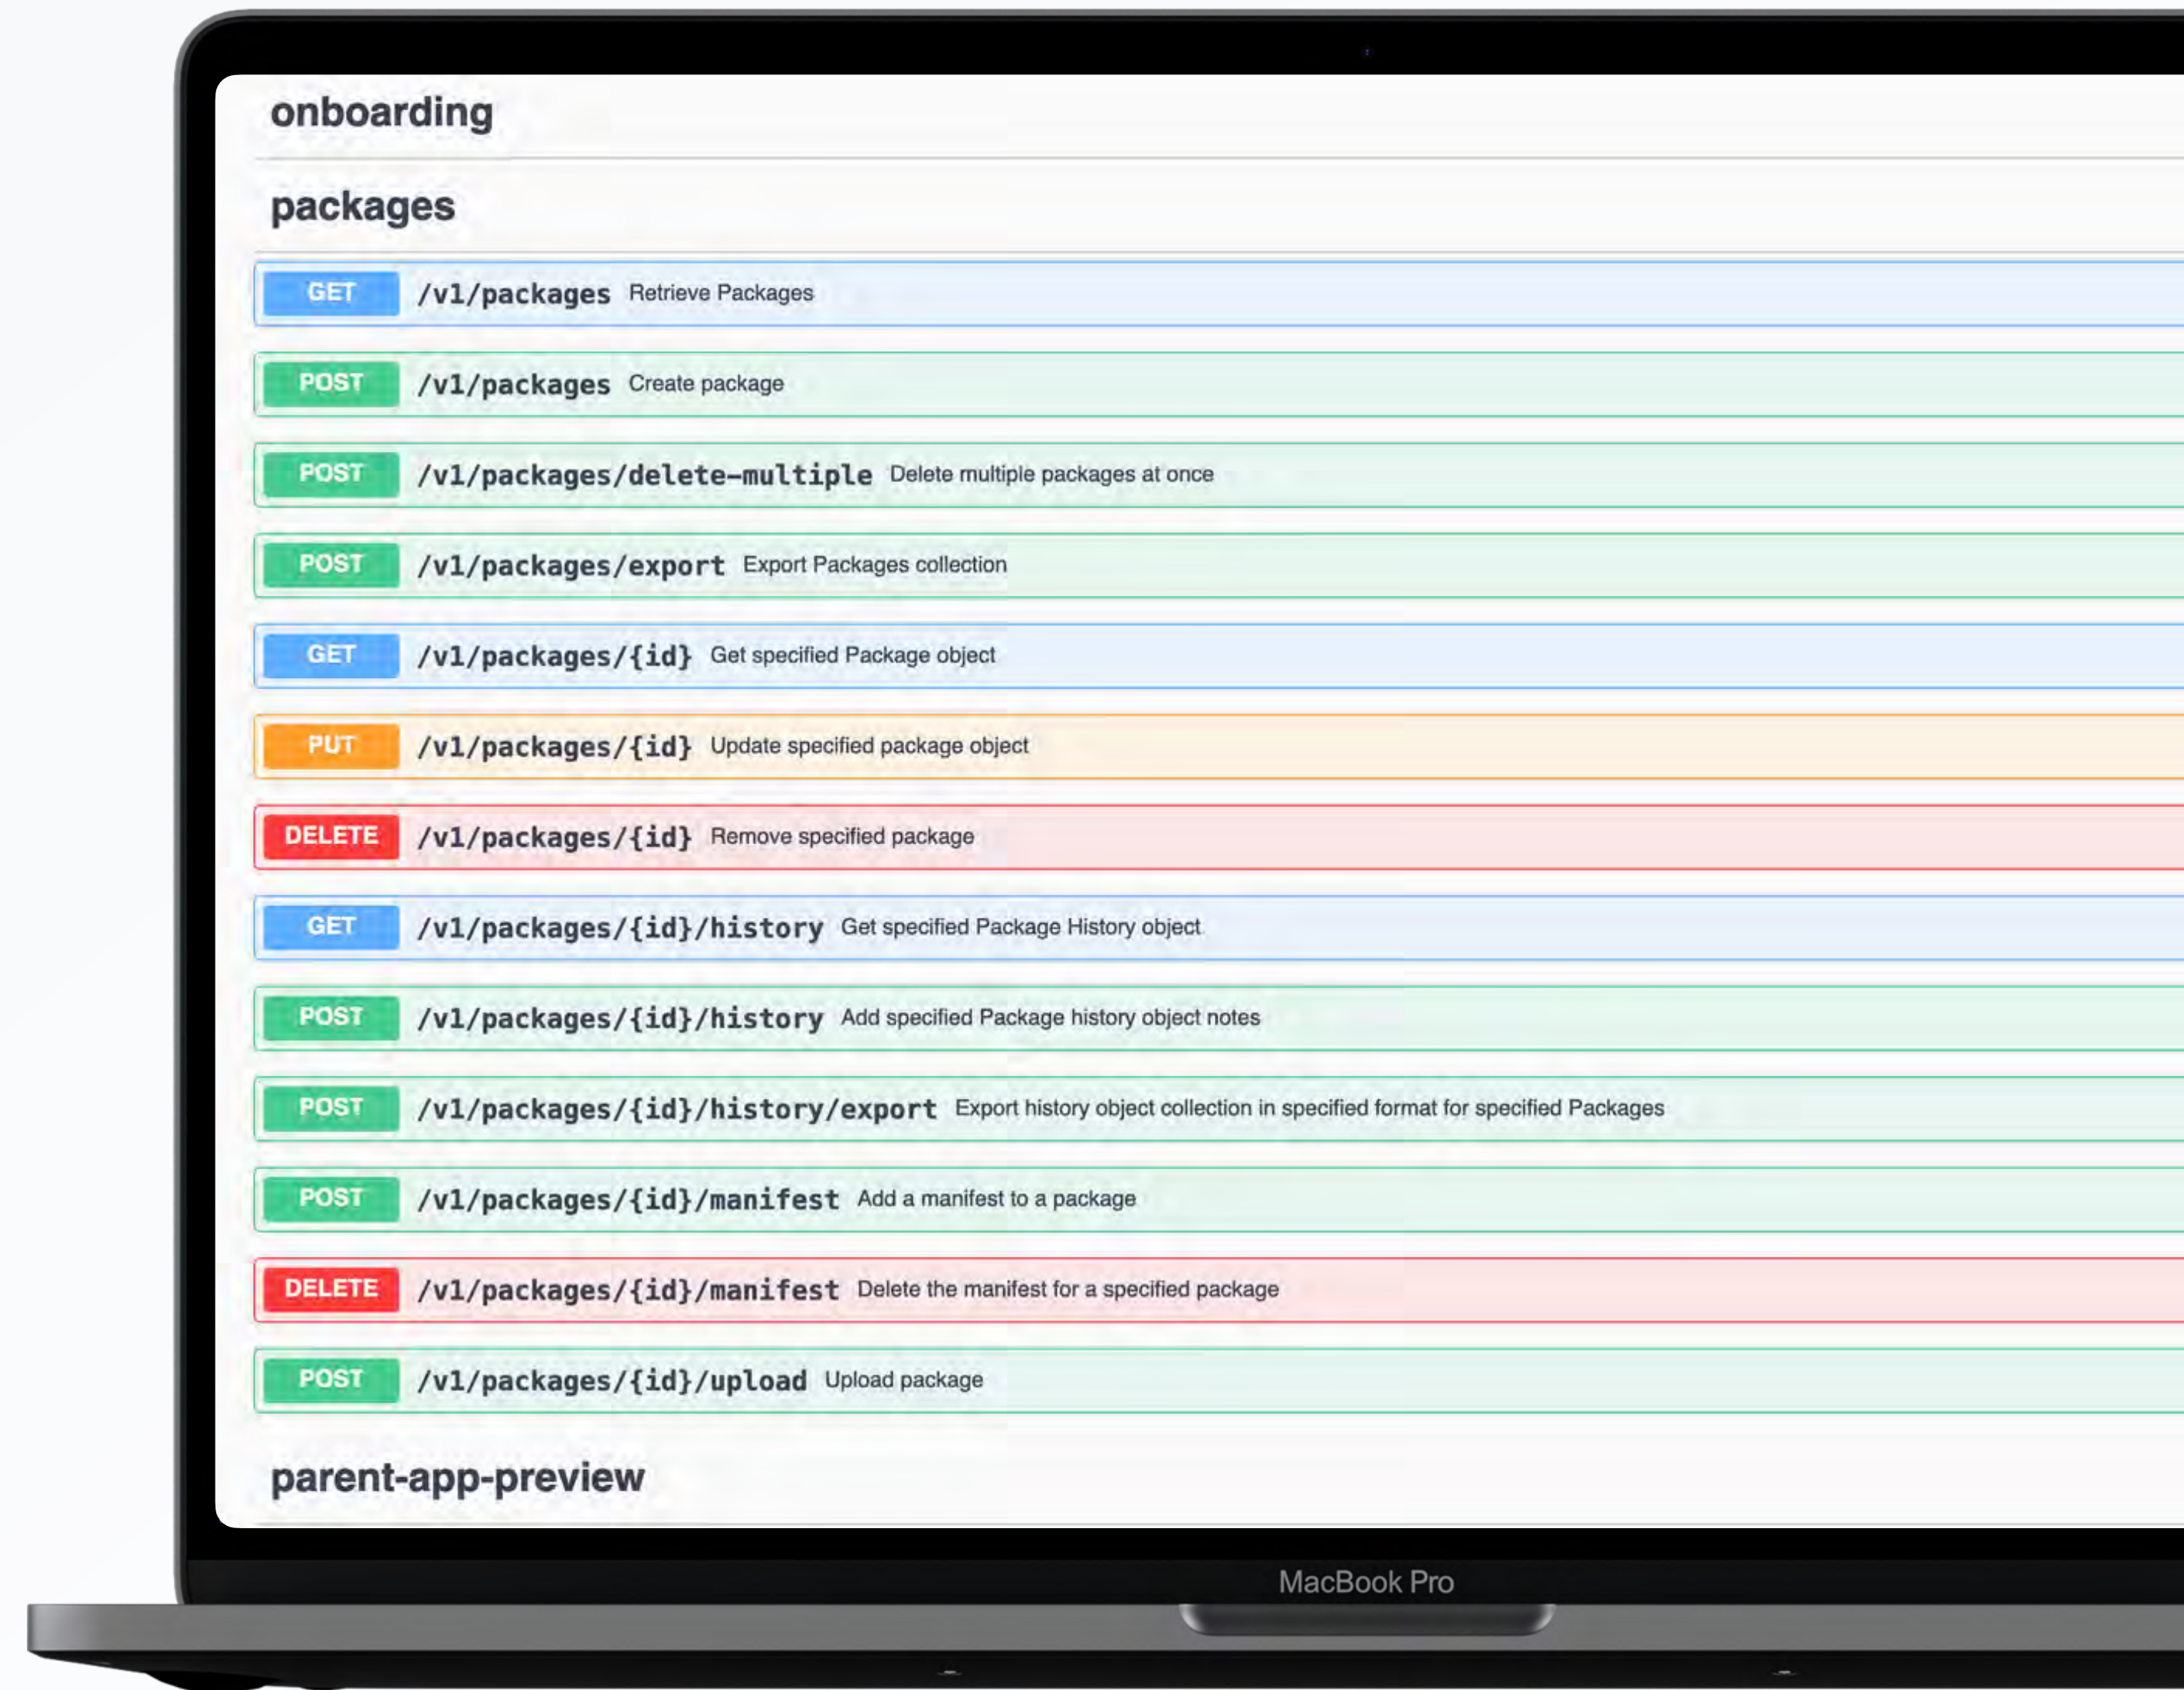

Jamf Cloud Distribution Service 2.0

Released in February, 2024

IT admins have the ability to host files for distribution to iPhone, iPad, and Mac.

- ▶ Fully re-built with the latest AWS features.
- ▶ Add, Download, and Delete files programmatically via the Jamf Pro API.
- ▶ Improved performance and provides support for larger package uploads.

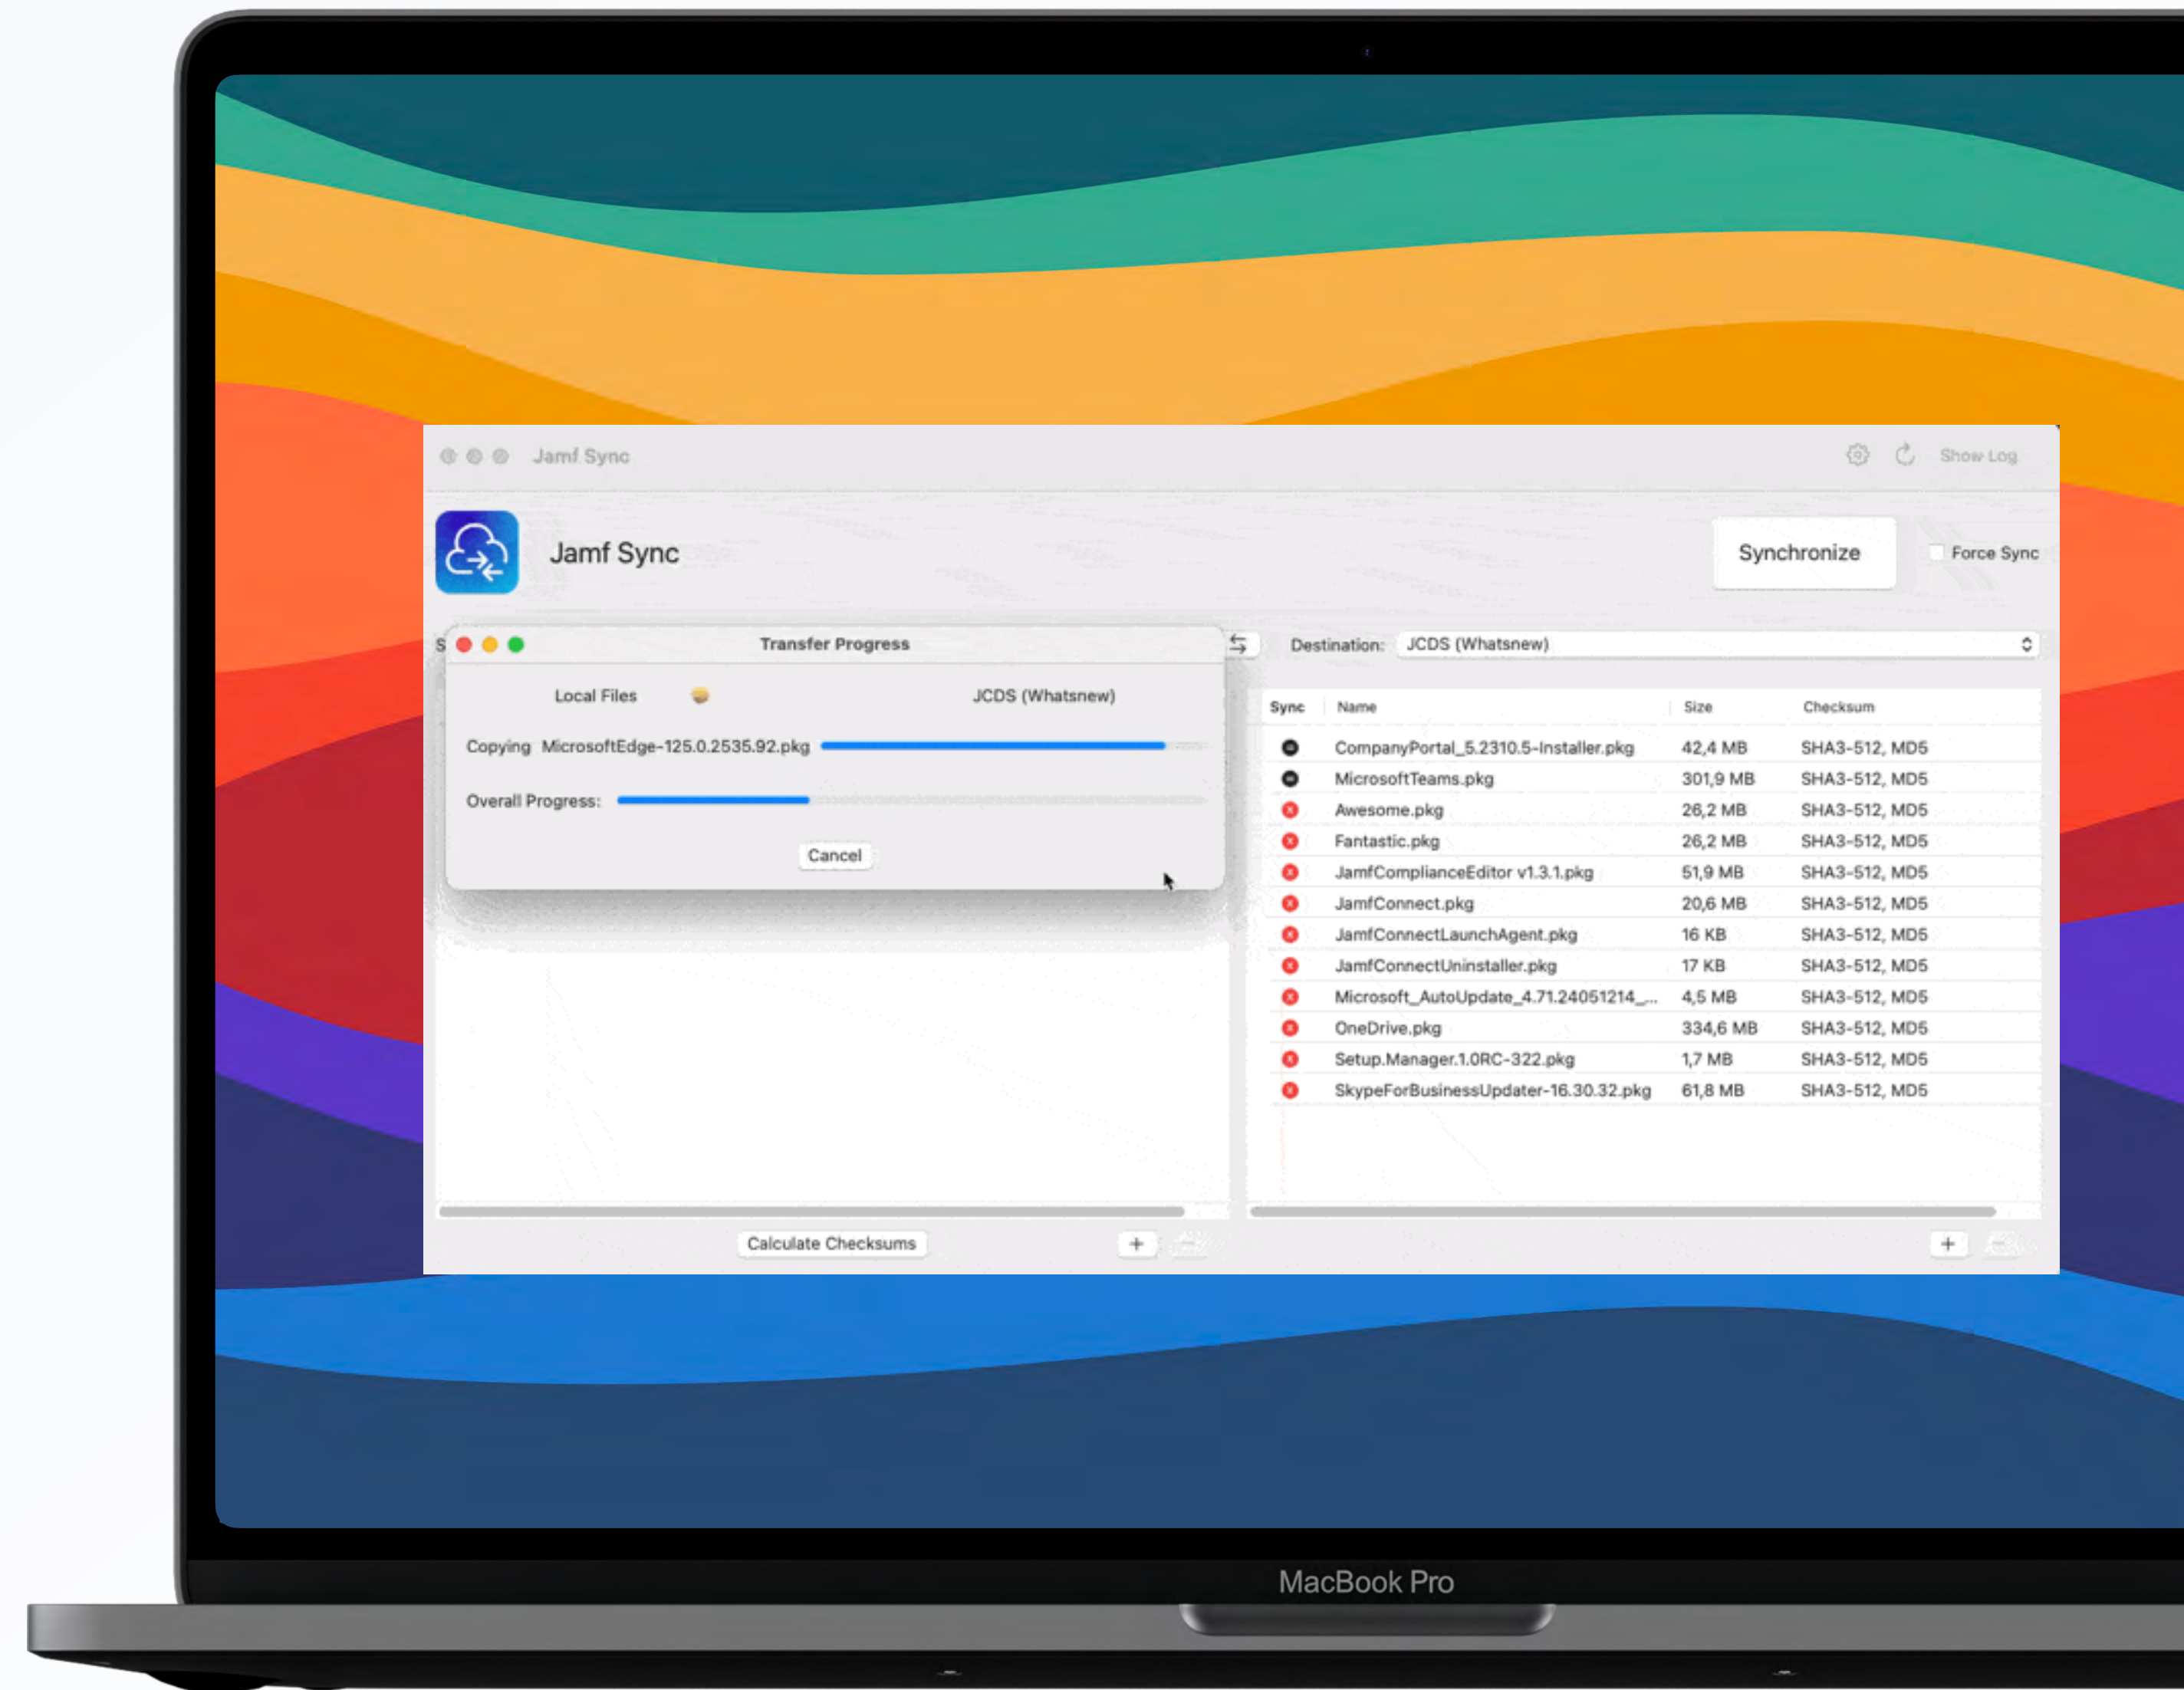

Jamf Cloud Distribution Service 2.0

Released in February, 2024

IT admins have the ability to host files for distribution to iPhone, iPad, and Mac.

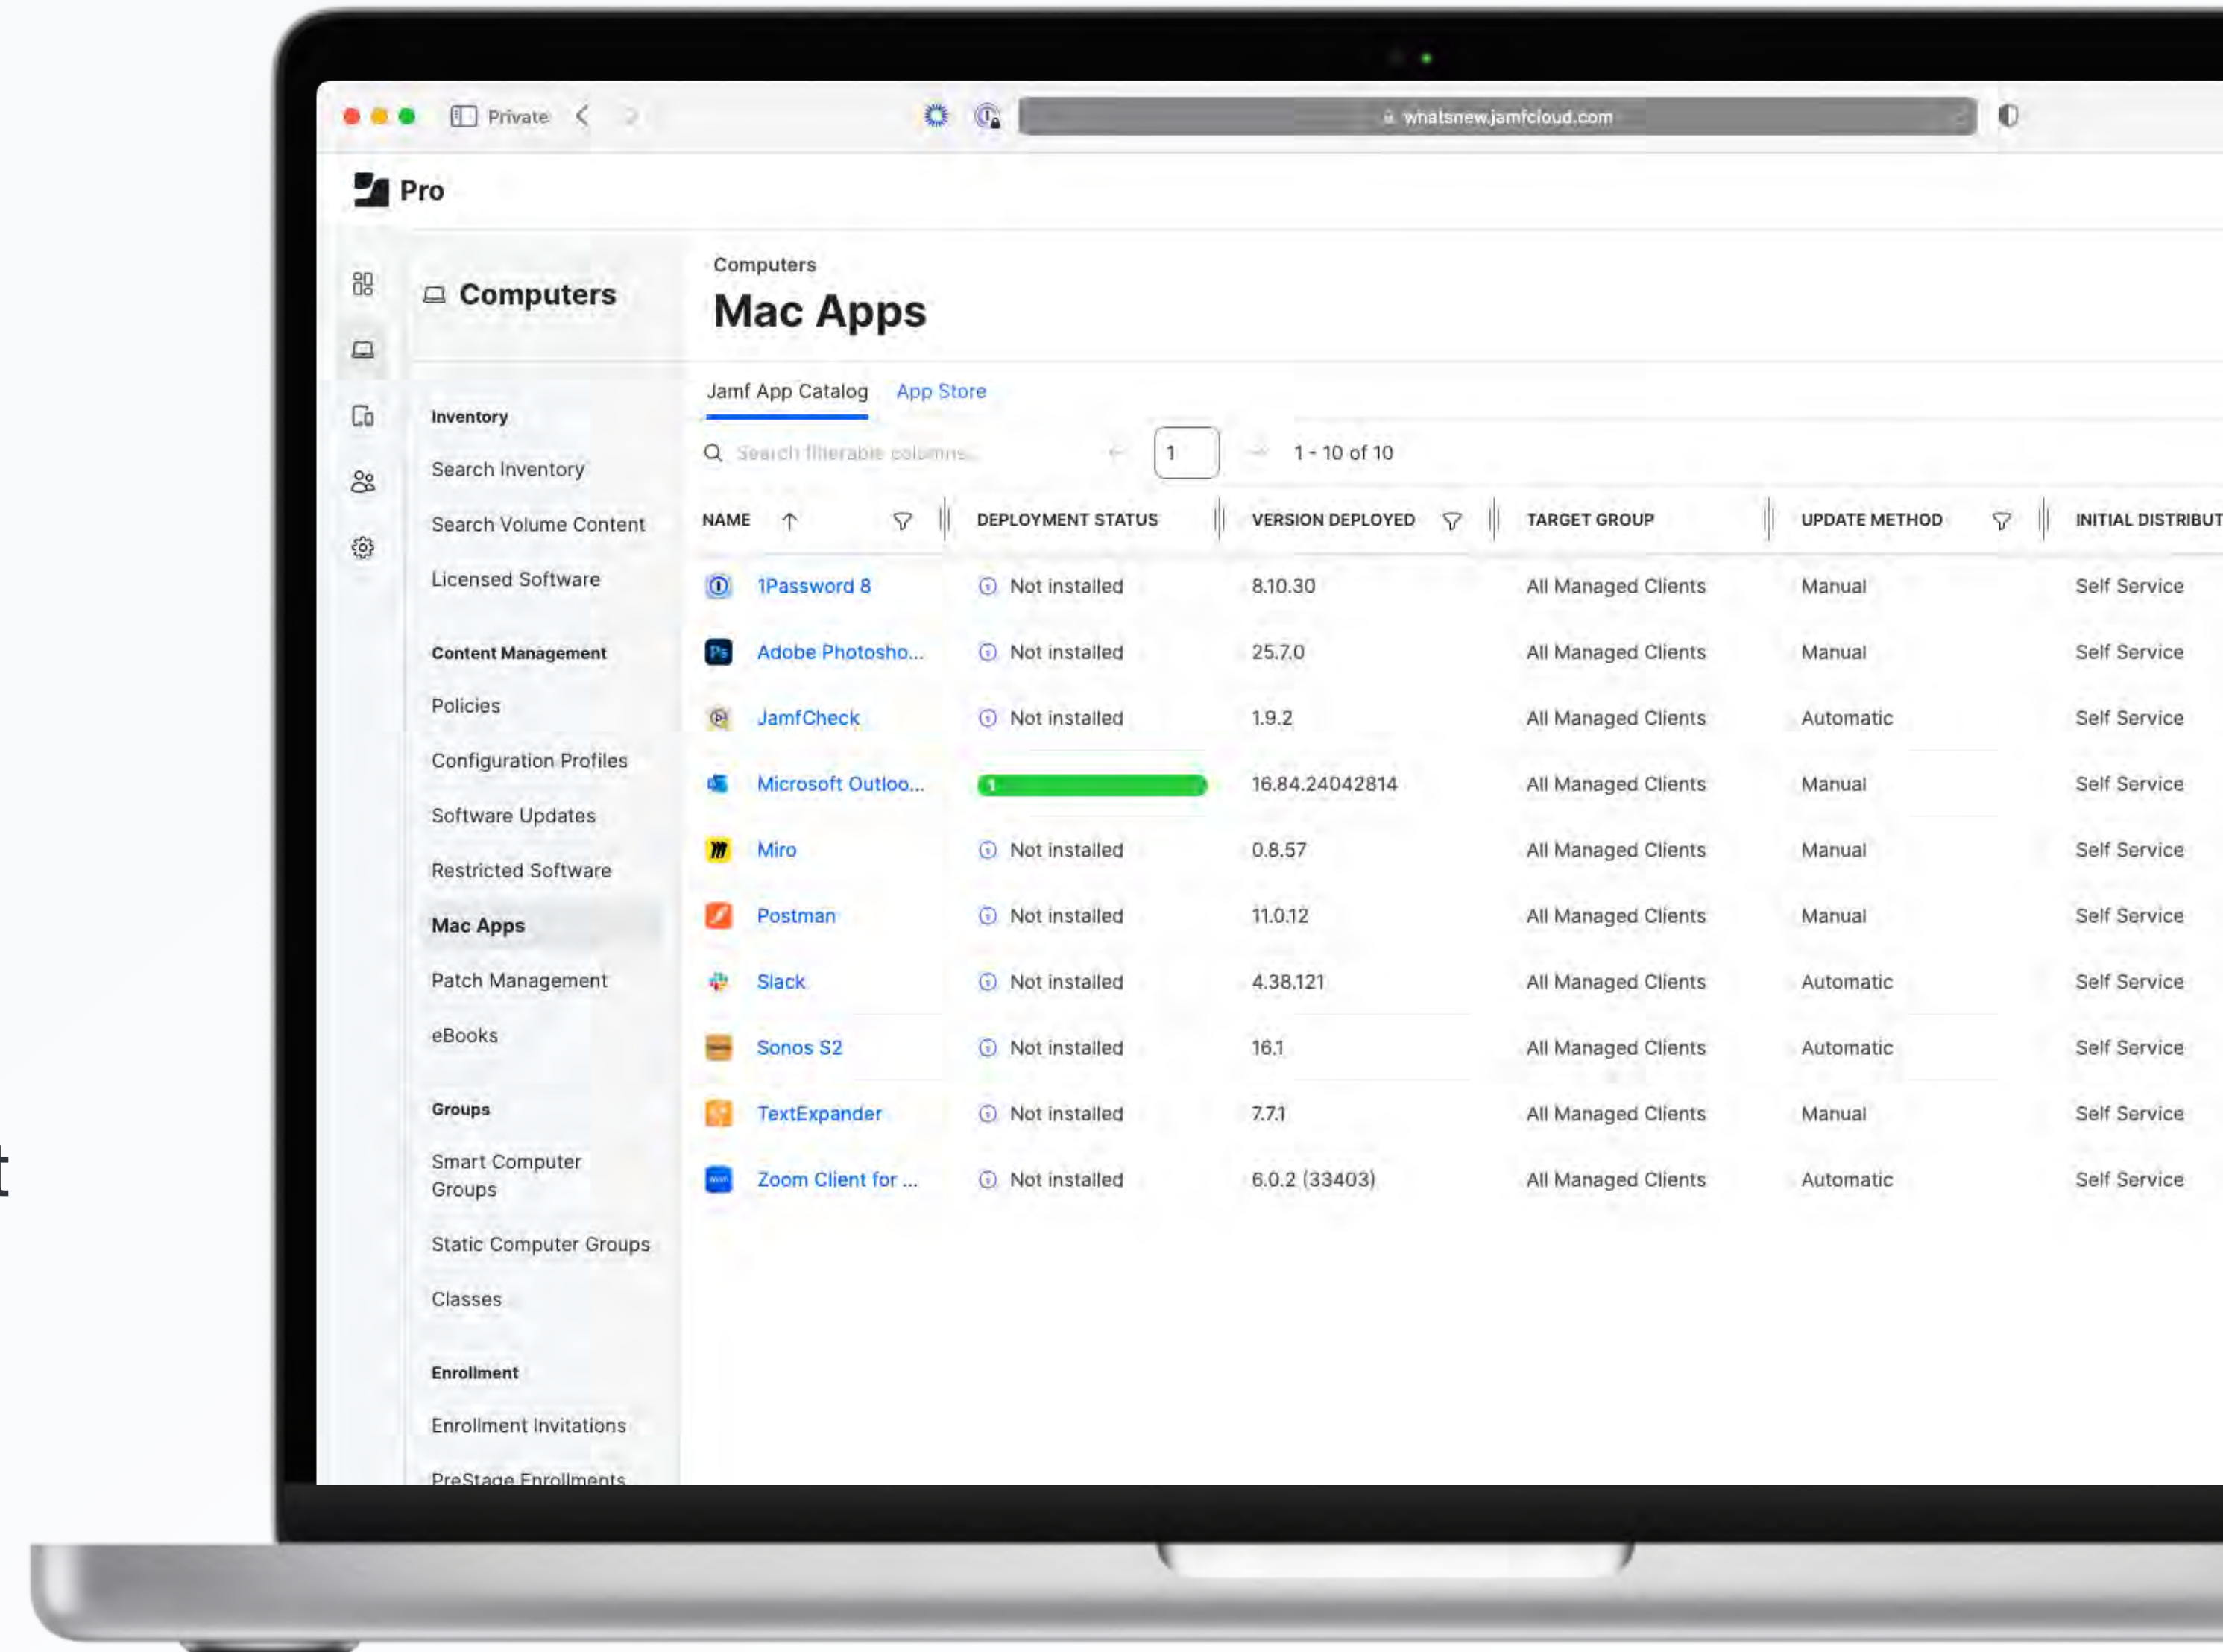

- ▶ Fully re-built with the latest AWS features.
- ▶ Add, Download, and Delete files programmatically via the Jamf Pro API.
- ▶ Improved performance and provides support for larger package uploads.

Jamf App Installers Update

Released in November, 2023

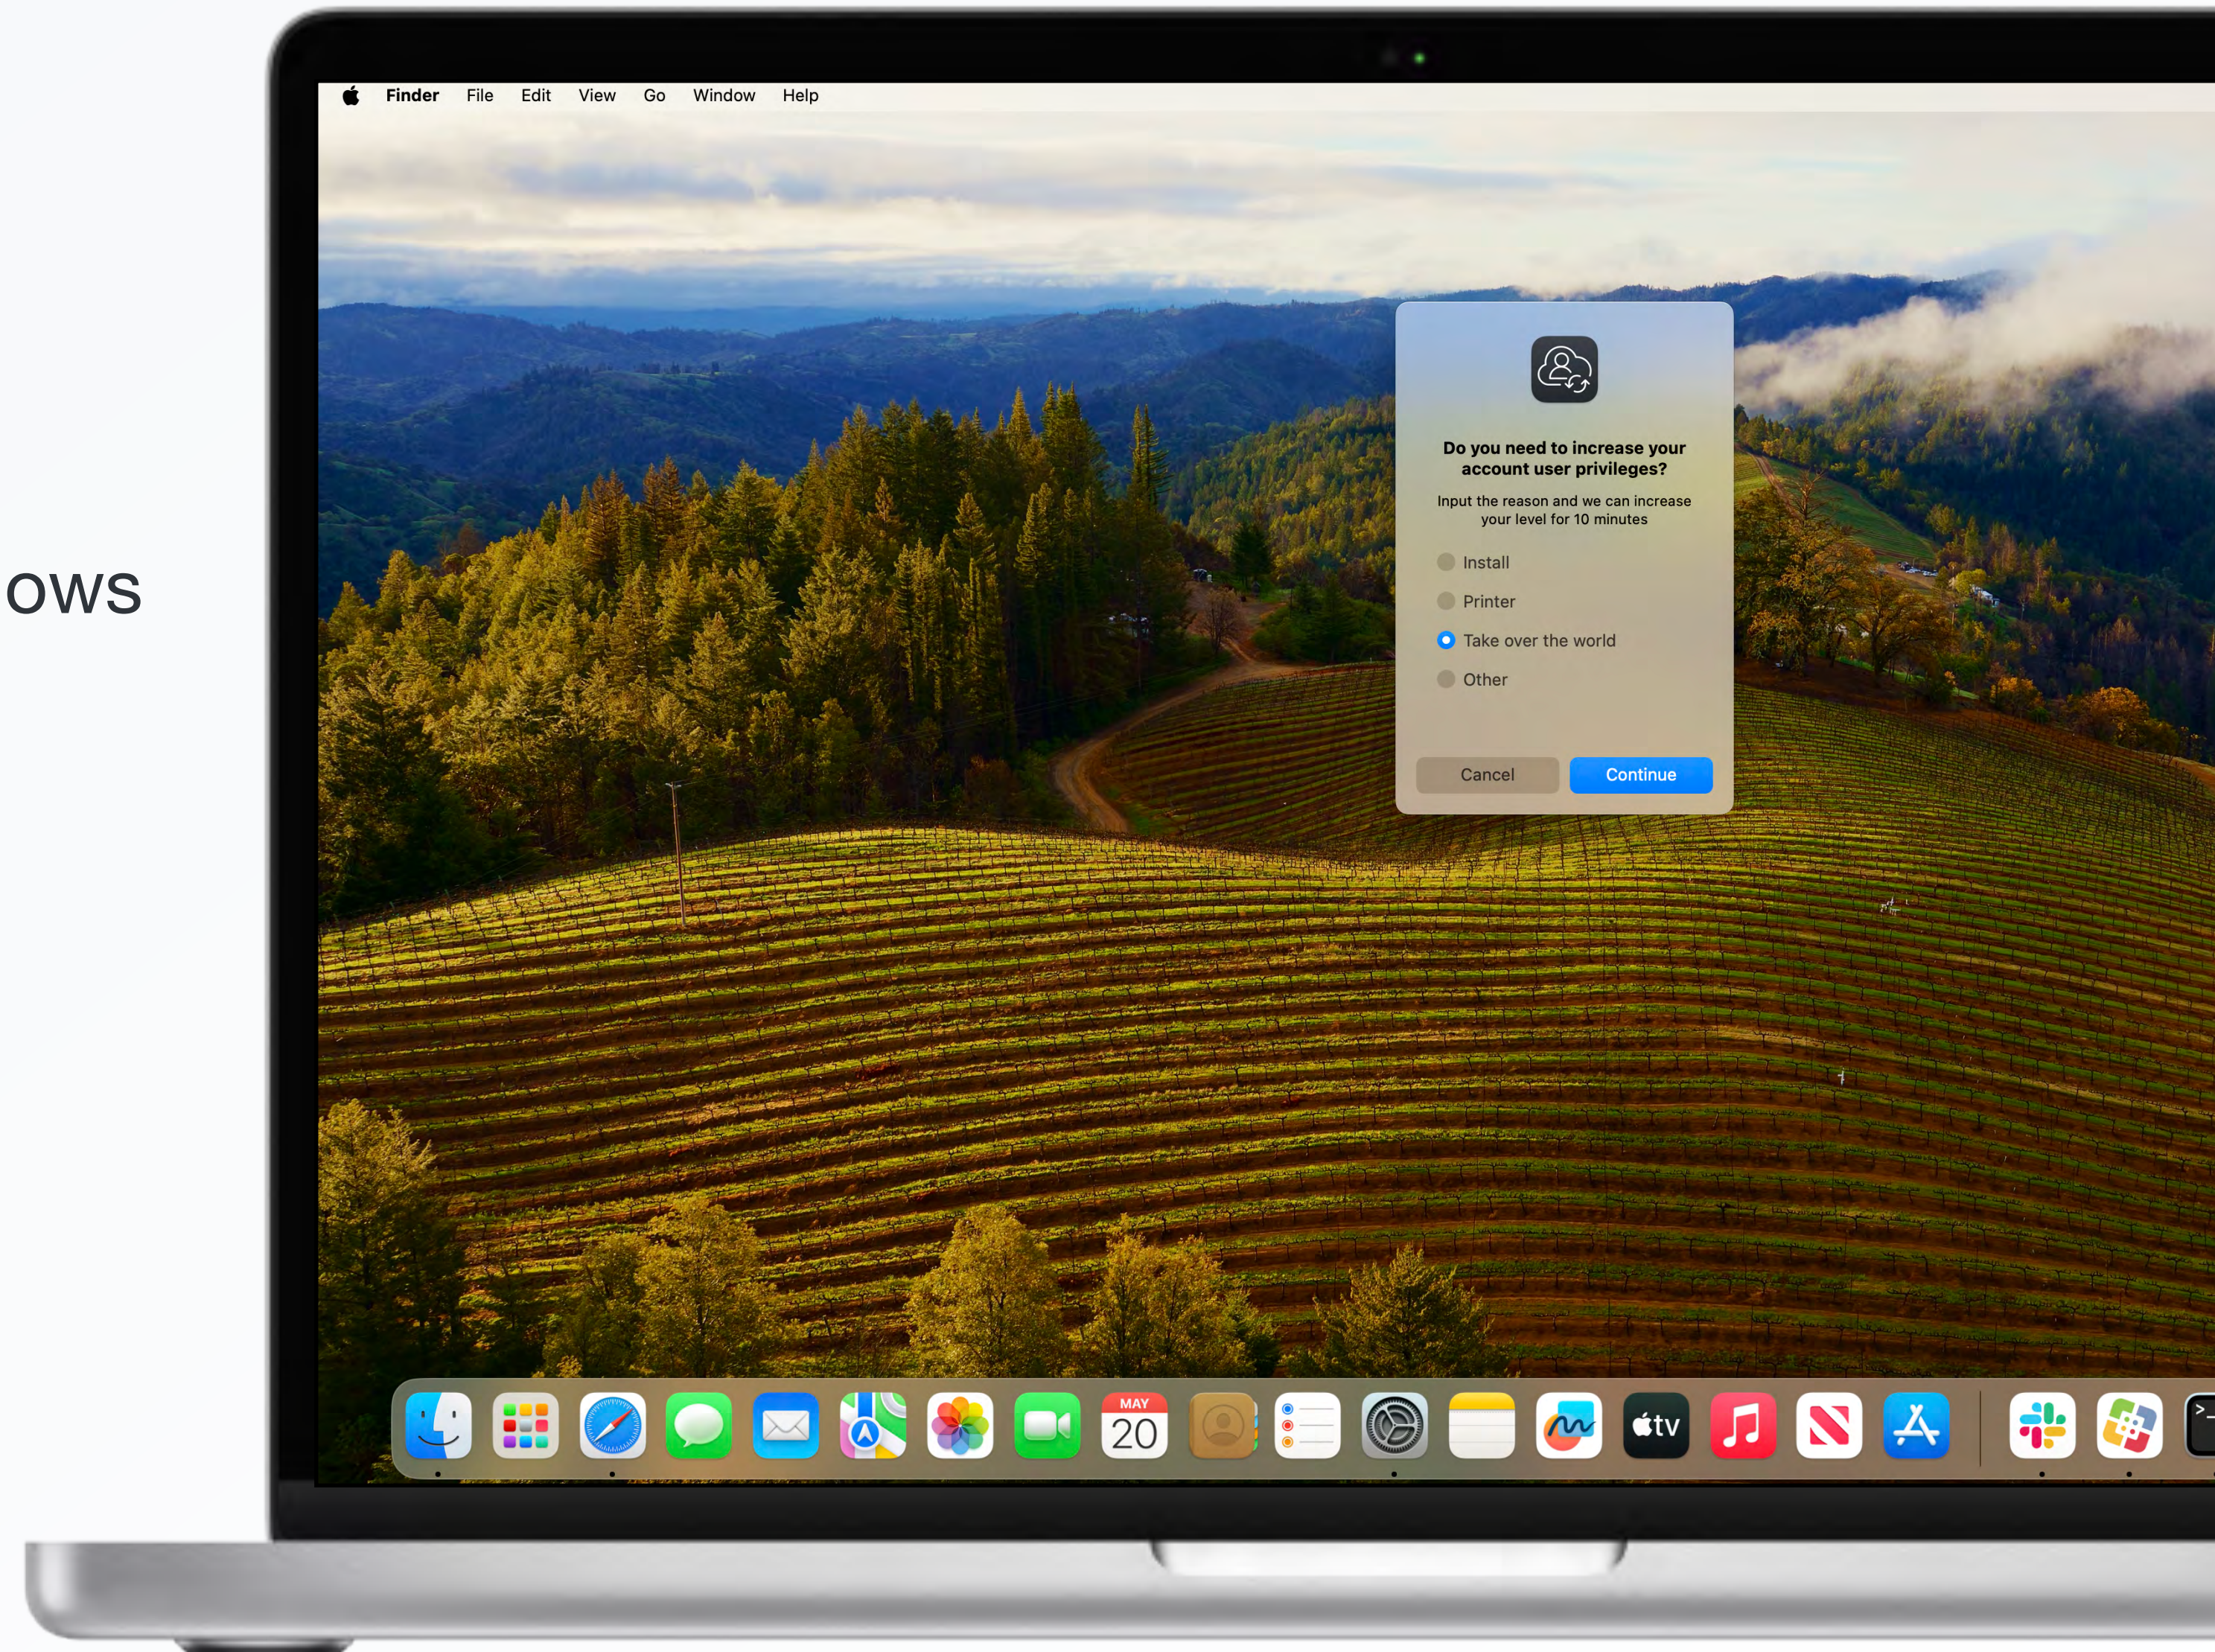

- ▶ Deploy and update automatically more than **170 macOS apps**
- ▶ **One-click activation** or advanced configuration to suit most customer needs
- ▶ Automated and Self Service deployment
- ▶ Installed app detection and **version control** capabilities

Jamf Connect

Released in March, 2024

- ▶ **Privilege Elevation**
- ▶ The Jamf Connect menu bar app now allows standard users to initiate a **temporary promotion to a local administrator**
- ▶ Upon activation, a **timer displays** in the user's menu bar for the duration of their promotion
- ▶ This feature can be added to a Jamf Connect configuration via the **Jamf Connect Configuration app**

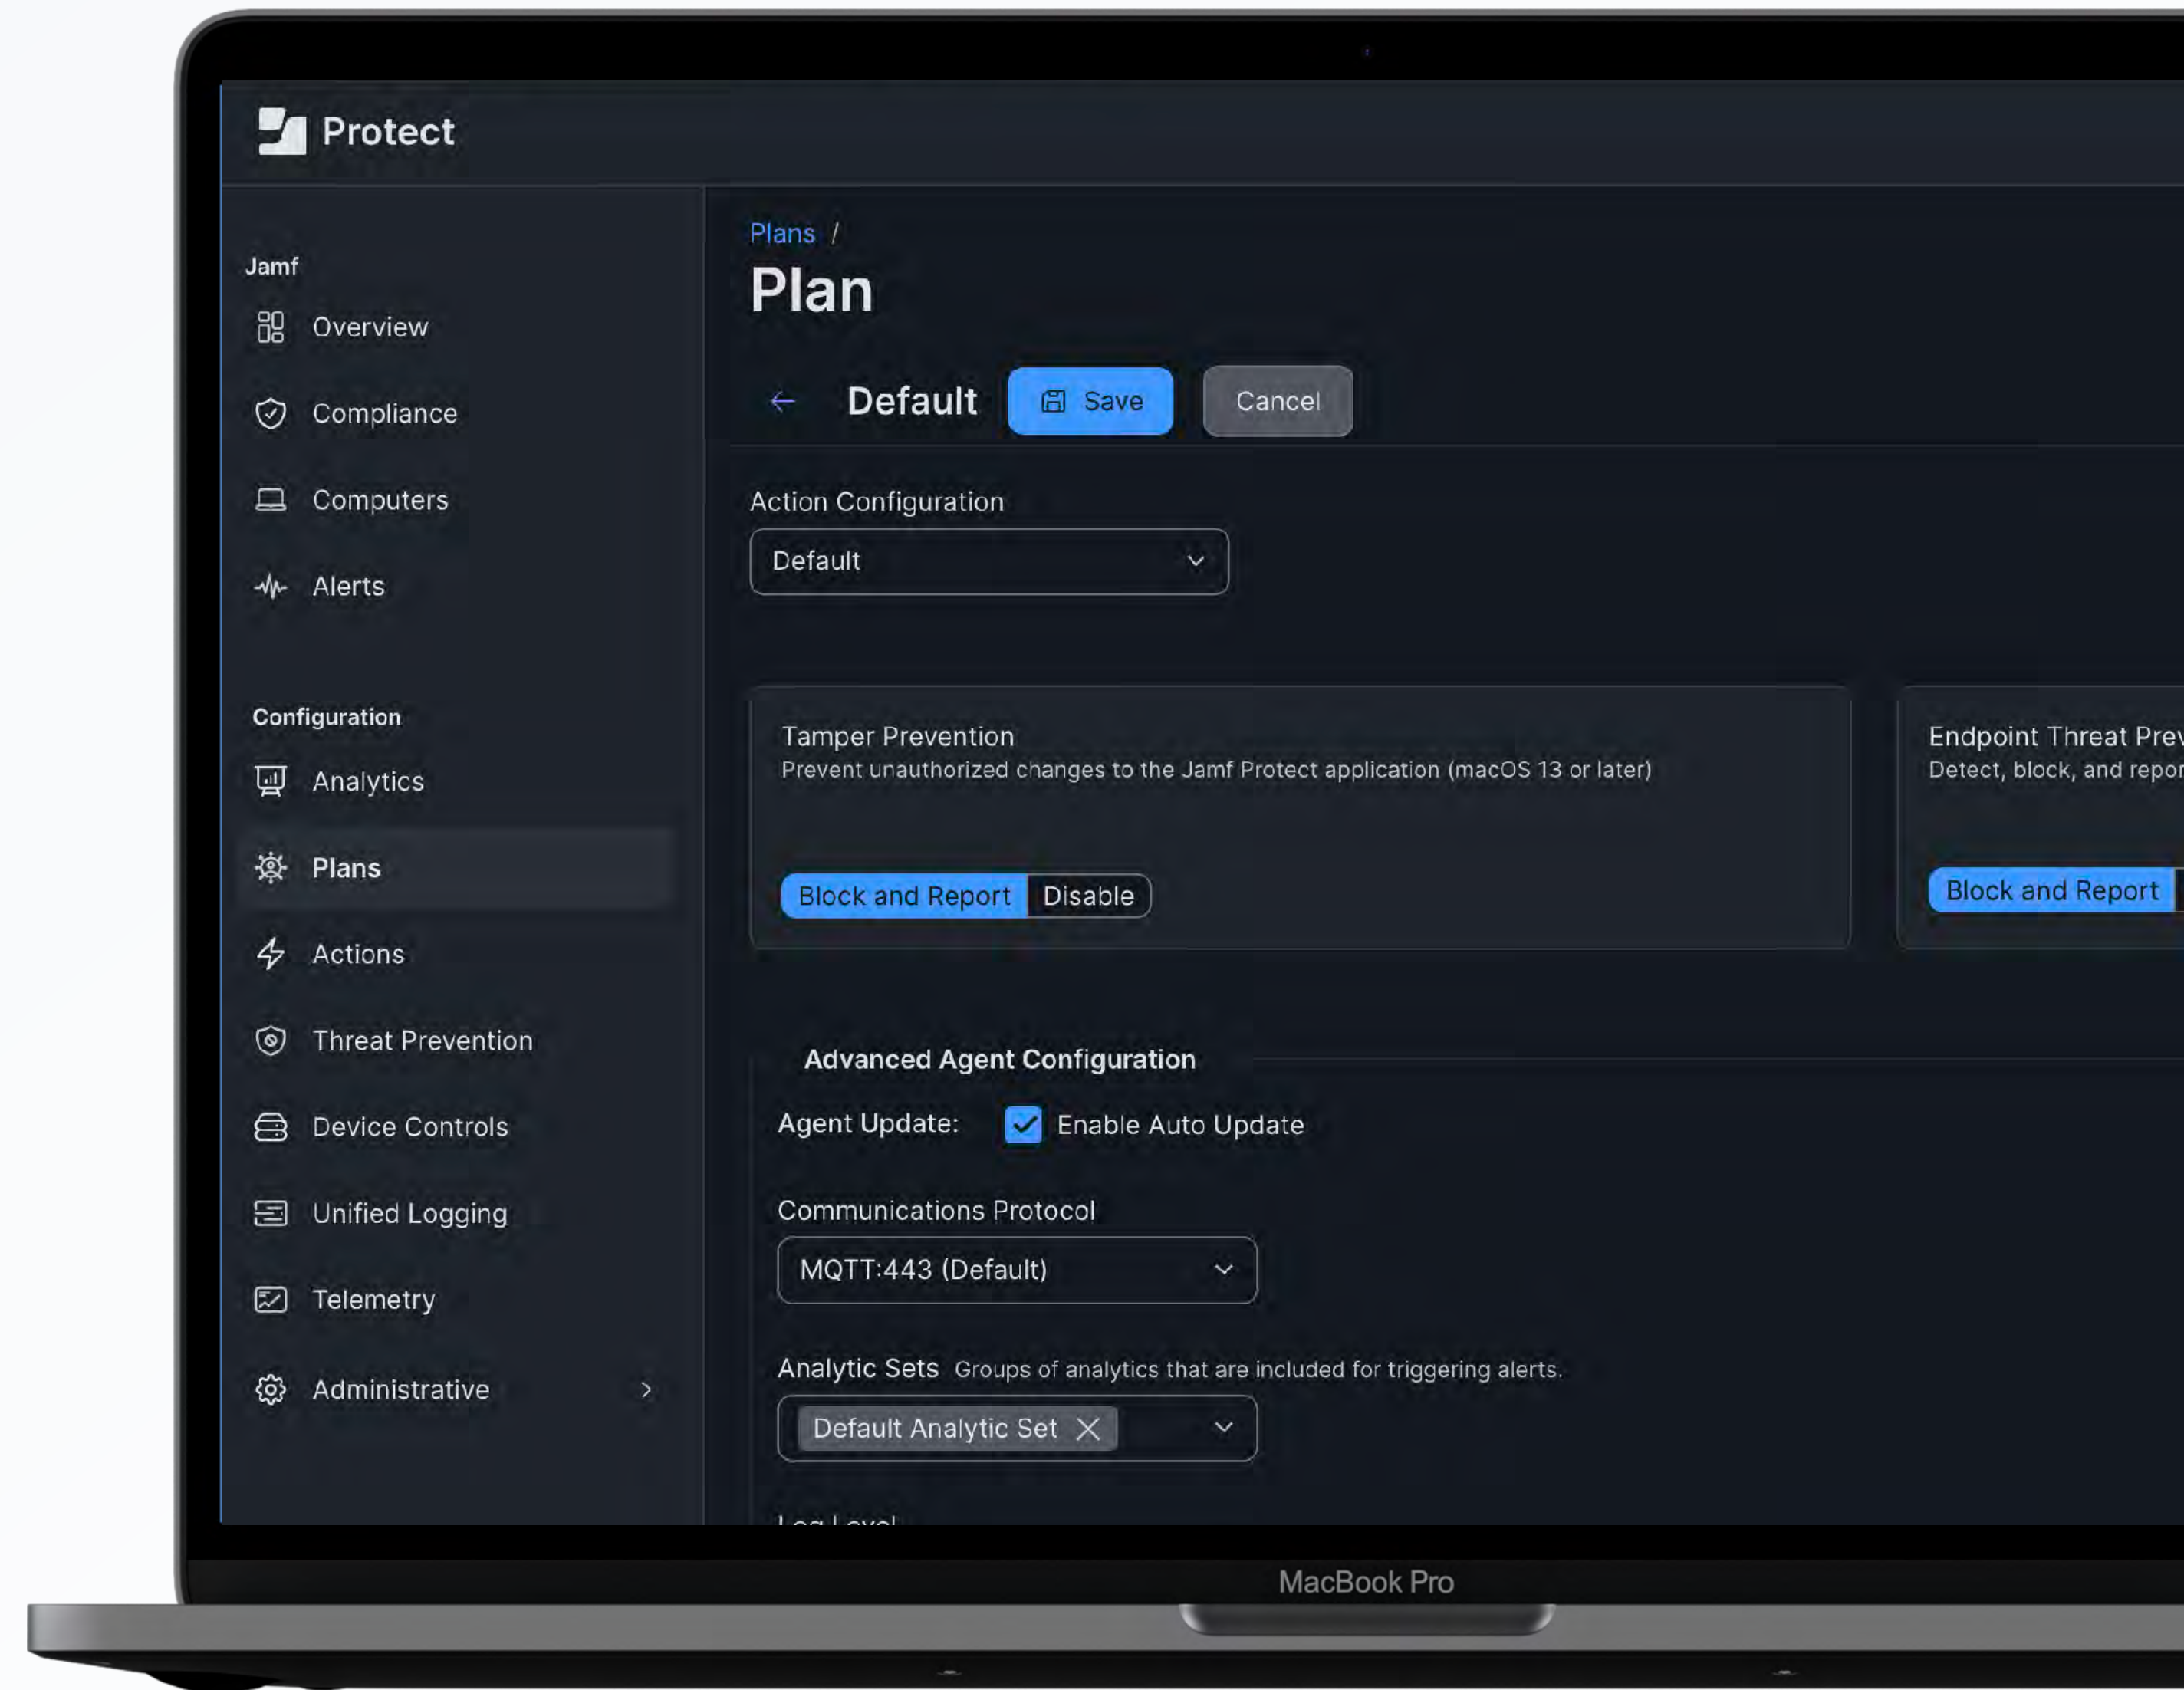

Jamf Protect Tamper Protection

Easy to Enable

**Enhances Jamf Protects
functionality utilising macOS's built-in
System Integrity Protection (SIP).**

Advanced Logging

**Telemetry to capture modification
via terminal**

Jamf Protect Compliance Baselines.

Rebranded 'Compliance Tab'

A new Compliance Summary section provides a clearer picture of your enrolled devices.

Baseline Rules

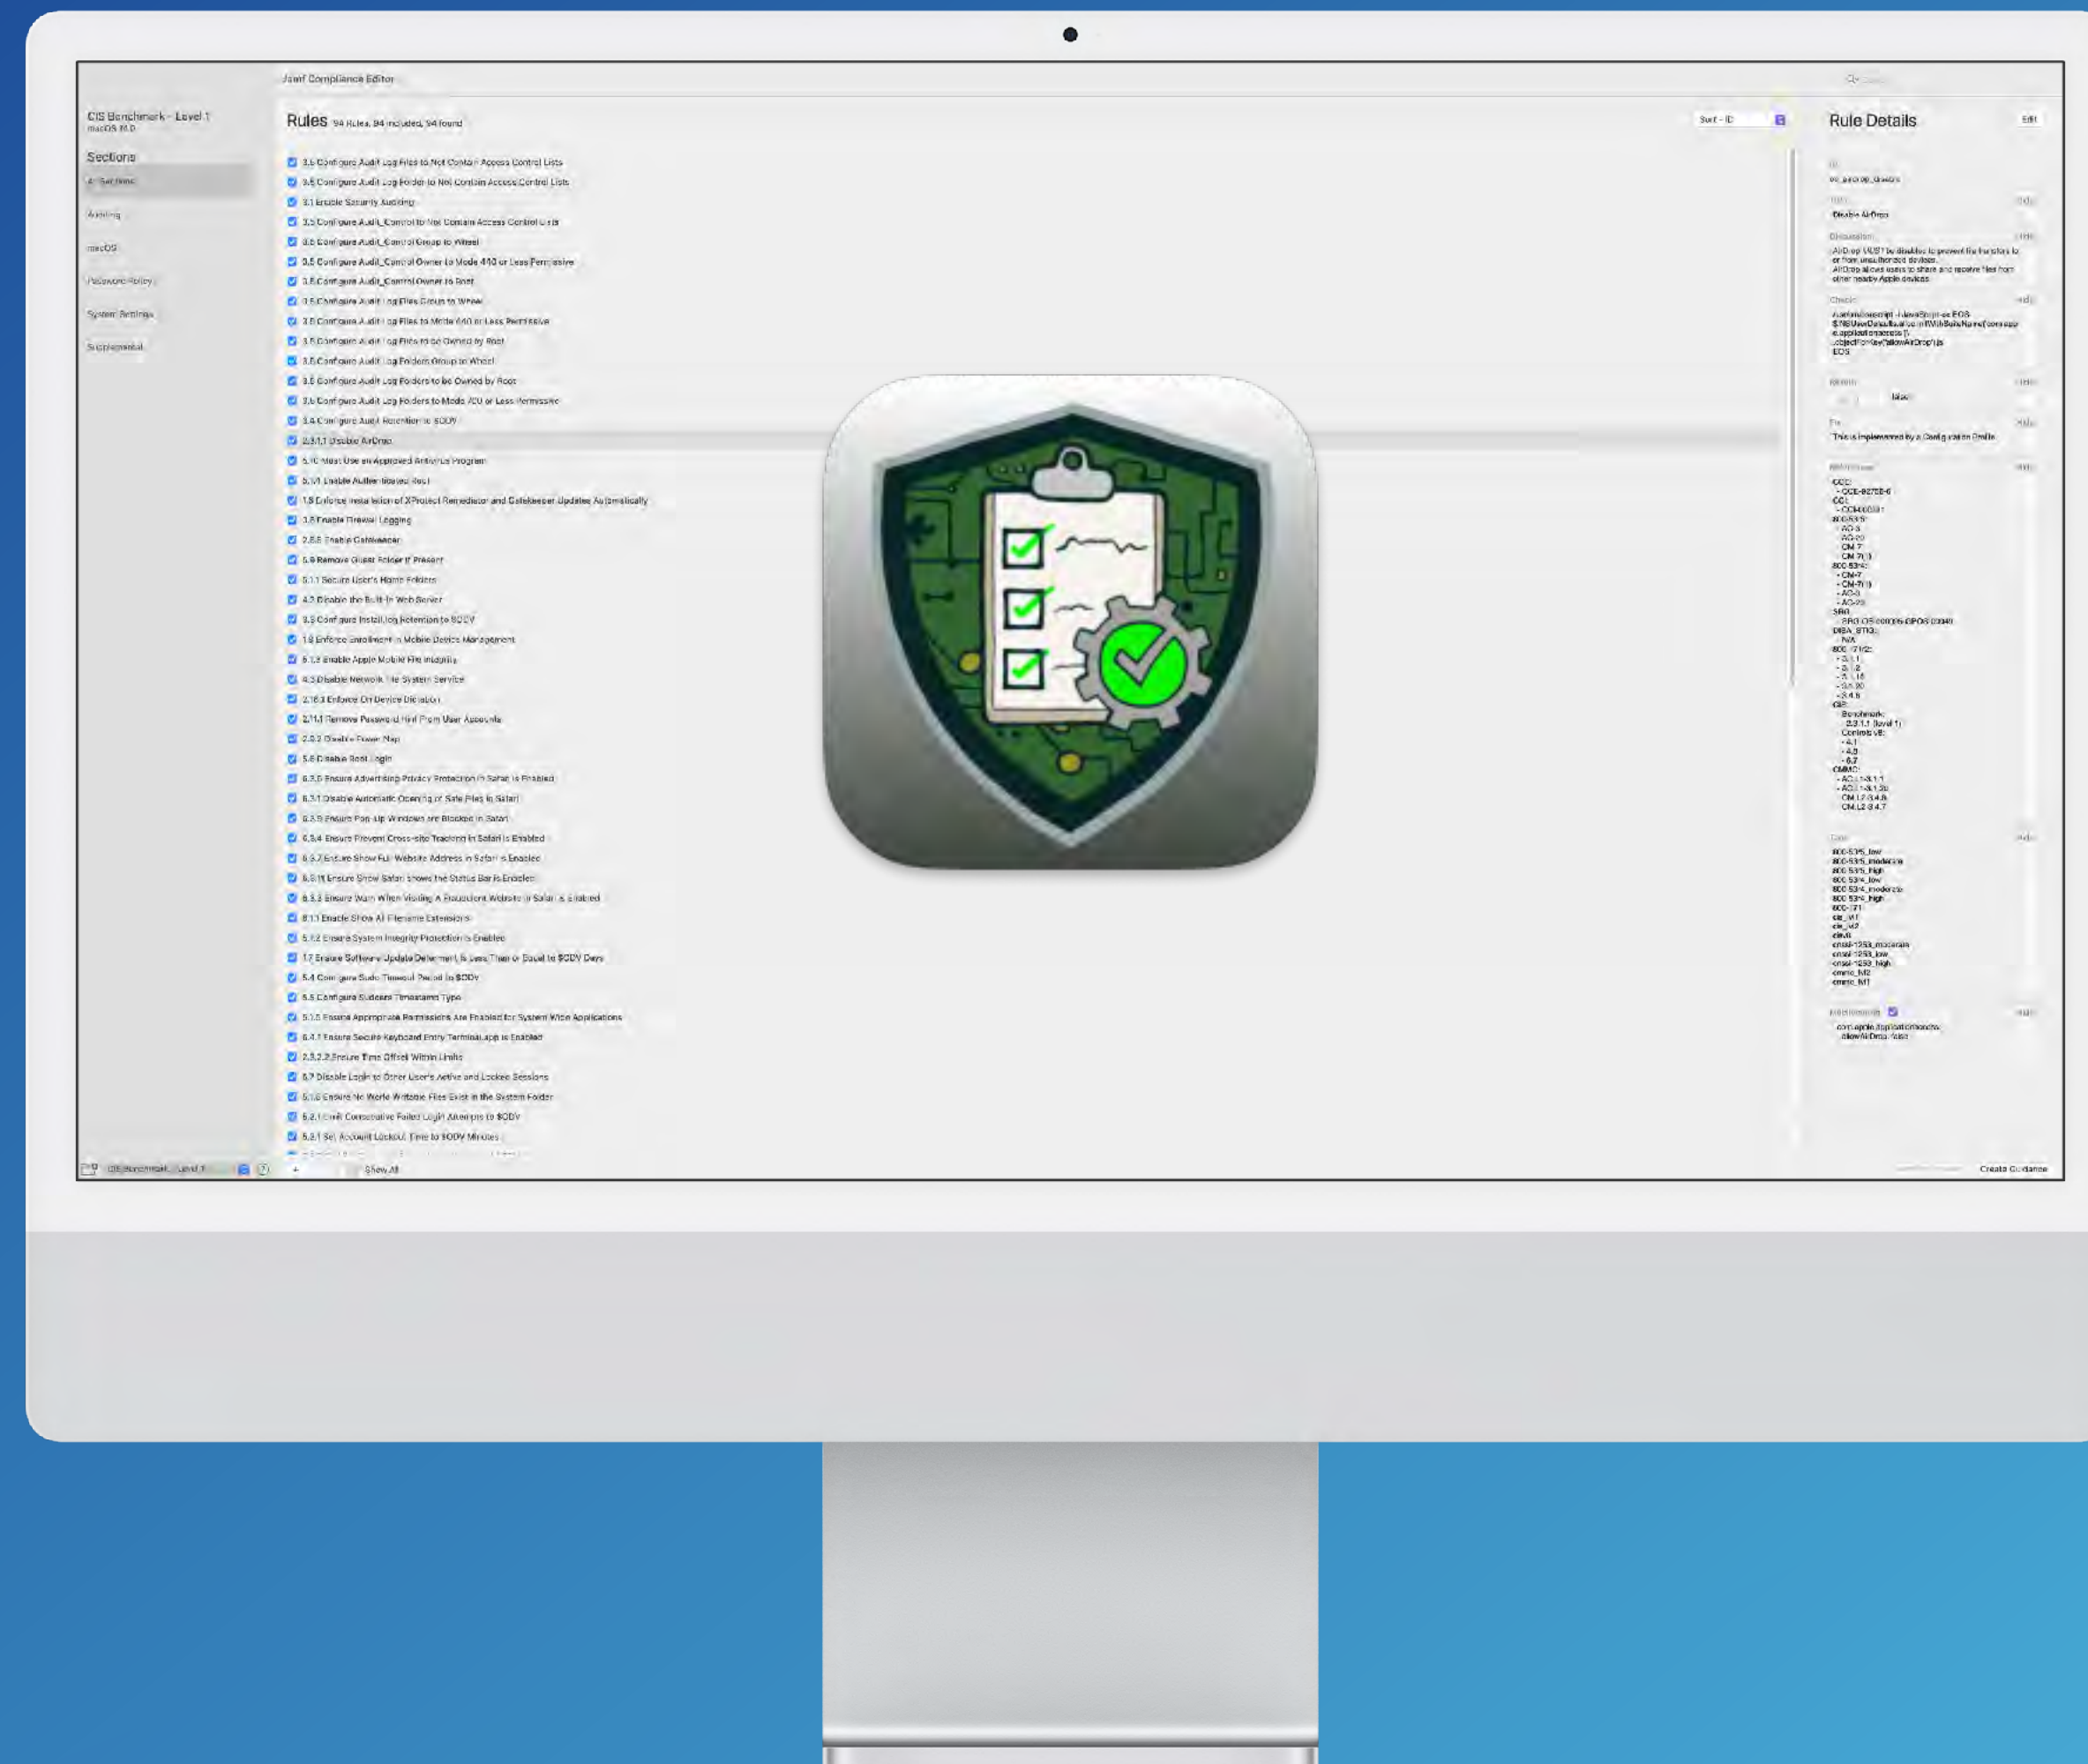

Use this section to monitor places for improvement and easily monitor device compliance.

Jamf Pro Compliance Editor.

A free, native macOS app built atop the macOS Security Compliance Project.

- ▶ Jamf Pro Integration
- ▶ Custom baselines to fit the needs of your organisation
- ▶ Simplify the process of adhering to security benchmarks

Automate Tasks Routines

- ▶ Templates – provide a starting point to create a routine.
- ▶ Integrations – connects a routine to your Jamf Pro server and other third-party tools.
- ▶ Routine – the outcome of the selected template, integrations and other inputs.

On-Device Content Filtering ODCF

- ▶ URLs – evaluation of full paths and query parameters, even with TLS encryption
- ▶ IP addresses – block not only single IP addresses but also ranges and subnet
- ▶ Bundle IDs – full traffic filtering of all incoming and outgoing traffic in iOS/iPadOS apps

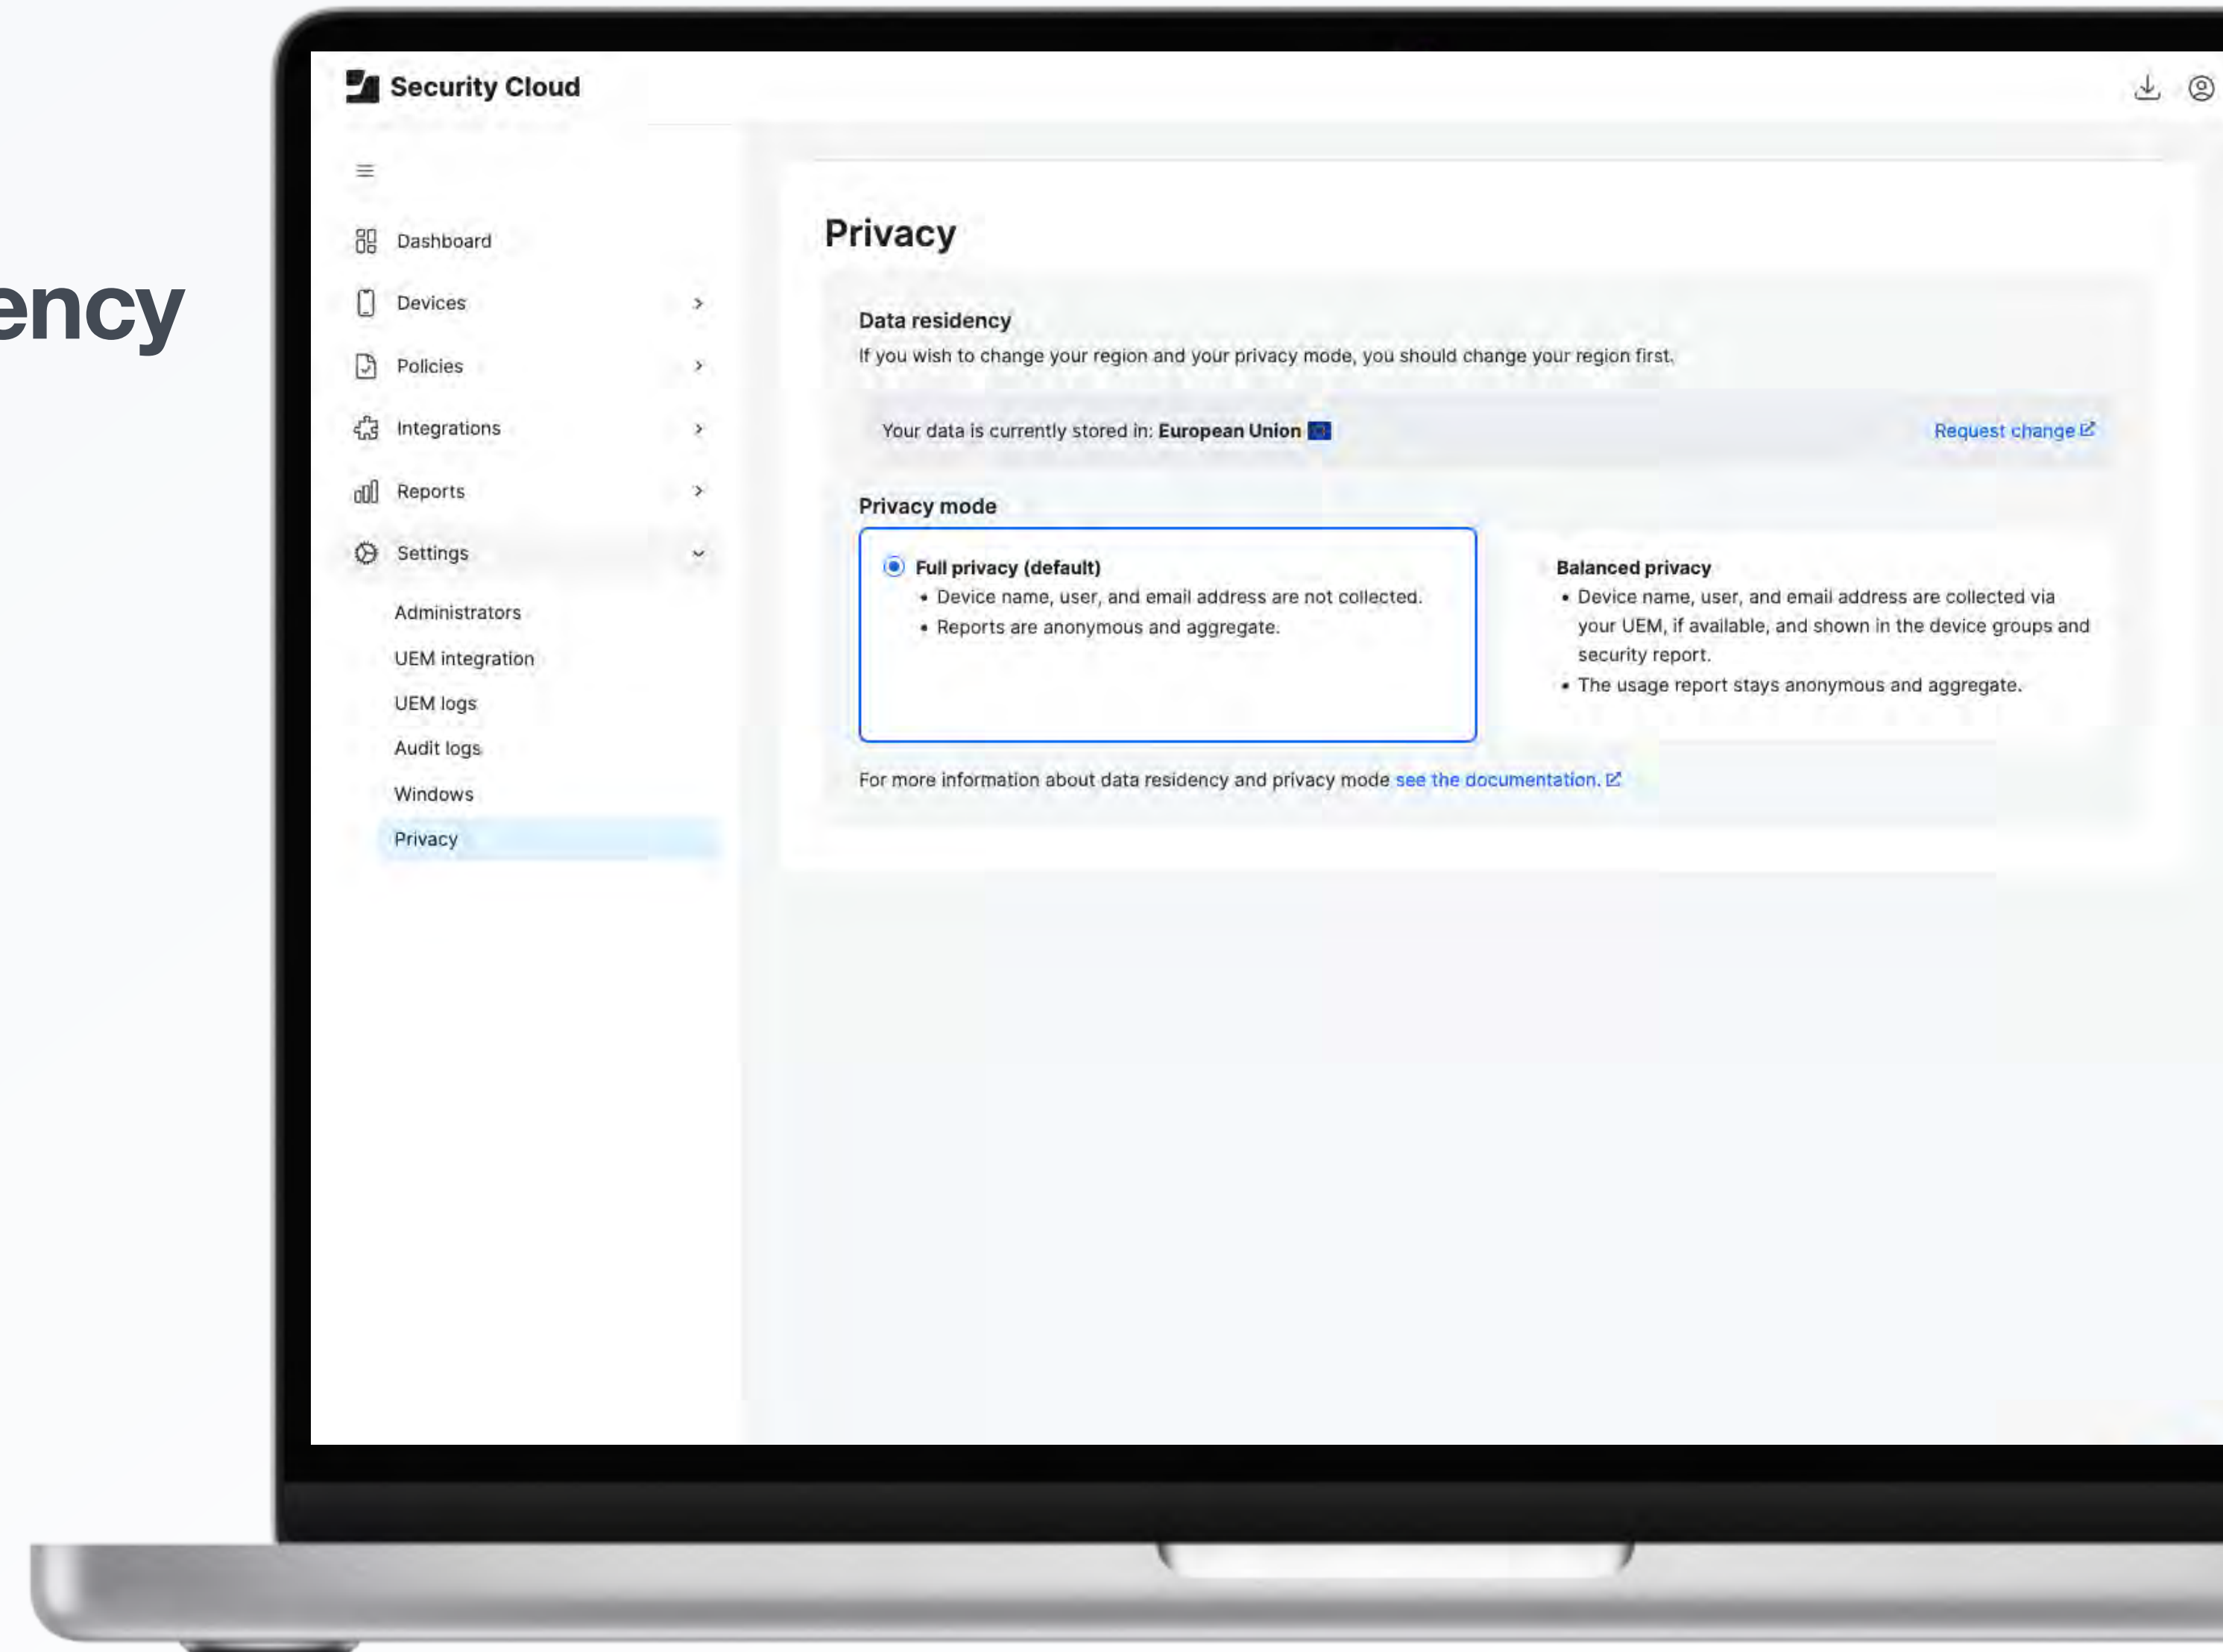

Jamf Safe Internet

Privacy Settings and Data Residency

Released in March, 2024

- ▶ New privacy settings page for configuring **Privacy Mode** and **Data Residency**
- ▶ The **Privacy mode** setting allows customers to collect and display device identifiers in order to troubleshoot or remediate security issues
- ▶ The **Data residency** setting displays the region in which Jamf stores data and allows customers to request their data to be moved to a different region

Remote Assist

Empower the IT admin to support their end users, and Apple devices wherever they are.

- Start a Remote Assist session directly from Jamf Pro
- Privacy-first end-user notifications
- On-prem and Cloud support for macOS
