

Jamf Threat Defense

Sub-processors

Jamf may engage vendors to provide services on our behalf. Any vendor who may process Customer Content, as defined in Jamf's [Software License and Services Agreement](#) (SLASA), are considered sub-processors and are disclosed below. As set forth in Jamf's [Data Processing Agreement](#) (DPA), Jamf has adequate data transfer mechanisms in place with each sub-processor.

| Sub-processor | Location(s) of processing* | Purpose of processing |
|--|--|--|
| Alphabet Inc. (Google Cloud Platform) | Belgium, Netherlands | Regional edge services |
| Amazon Web Services, Inc. | Ireland | Cloud hosting (Core services) |
| Amazon Web Services, Inc. | Australia, Brazil, Canada, France, Germany, Hong Kong, India, Ireland, Italy, Japan, Singapore, South Africa, South Korea, Spain, Sweden, Switzerland, United Kingdom, United States | Regional edge services |
| Astronomer, Inc. | United States | Orchestration and workflow management for data pipelines |
| Microsoft Corp (Microsoft Azure) | Norway | Regional edge services |
| Tableau Software | Ireland | Ad-hoc requests by customers for reports |
| The Rocket Science Group, LLC (Mailchimp) | United States | Email notifications |

| | | |
|------------------------------|---------------|------------------------|
| T-Systems International GmbH | Germany | Regional edge services |
| Twilio, Inc. (Sendgrid) | United States | Email notifications |

* The countries listed for regional edge services are dynamically chosen based on proximity to the endpoint.

Jamf may use additional sub-processors for customer support – see the sub-processor listing for Jamf Support.

New sub-processors will be communicated to all customers.
