4 Bug Fixes and Enhancements

4 Installation
4 Requirements
5 Upgrading Composer

Composer Versioning

Composer may have non-consecutive version numbers. The version number always corresponds with a version of the Casper Suite, but Composer is not necessarily released every time the Casper Suite is released.

Note: The Casper Suite is a complete macOS and iOS management solution available from Jamf Software.

Bug Fixes and Enhancements

This release provides minor performance enhancements.

Installation

Requirements

Composer can run on the following operating systems:

- macOS v10.7.x (Composer v9.81 or earlier)
- macOS v10.8.x (Composer v9.81 or earlier)
- macOS v10.9.x
- macOS v10.10.x
- macOS v10.11.x
- macOS v10.12.x

Composer v9.81 or earlier is available from Jamf Nation.

Upgrading Composer

To upgrade Composer, simply replace it with the most current version.

It is also recommended that you open Composer's Preference window and verify the new Exclusion List.
