5 Upgrading Composer

Composer Versioning

Composer may have non-consecutive version numbers. The version number always corresponds with a version of the Casper Suite, but Composer is not necessarily released every time the Casper Suite is released.

Note: The Casper Suite is a complete OS X and iOS management solution available from JAMF Software.

Bug Fixes and Enhancements

Fixed in v9.21:

[D-005583] Fixed an issue that sometimes prevented Composer from updating package manifests.

Fixed in v9.22:

[D-005723] Fixed an issue that caused an Active Directory (AD) account to be locked when using Composer while logged in to an OS X v10.9 computer with the account.

Fixed in v9.23:

- [D-005911] Fixed an issue that prevented Composer from capturing the background of a currently logged in user on a computer with OS X v10.9 when using the Desktop Pattern package manifest.
- [D-006072] Fixed an issue that prevented Composer from capturing clock settings for the menu bar on a computer with OS X v10.9 when using the Menu Bar Items package manifest.

Installation

Requirements

Composer v9.23 can run on the following operating systems:

- OS X v10.5.x
- OS X v10.6.x
- OS X v10.7.x
- OS X v10.8.x
- OS X v10.9x

Upgrading Composer

To upgrade Composer, simply replace it with the most current version.

It is also recommended that you open Composer's Preference window and verify the new Exclusion List.
