

# The Jamf Fundamentals plan

Providing enhanced management, core identity elements and cutting-edge security — all within Jamf Now's intuitive platform.

The Jamf Fundamentals plan combines Jamf's powerful mobile device management (MDM) technology with capabilities for protecting, connecting, and empowering an organization's end users. Including Malware Prevention, Password Sync, Self Service functionality for Mac, and the ability to deploy any iPad and iPhone app, custom profile and macOS package, everything is designed for simplicity — so no additional training is required.

Jamf Fundamentals goes beyond MDM capabilities to provide the most complete yet simple IT solution for businesses needing to manage and protect their entire Apple ecosystem, while securely providing access for employees who simply need to get work done. The Jamf Fundamentals plan helps provide the security and identity functionality businesses need when facing modern threats, all within an easy-to-use, intuitive platform to get up and running quickly.

## The Jamf Fundamentals plan offers everyone:

### Quick setup

Get up and running quickly to manage and secure Apple devices in minutes

### Ease of use

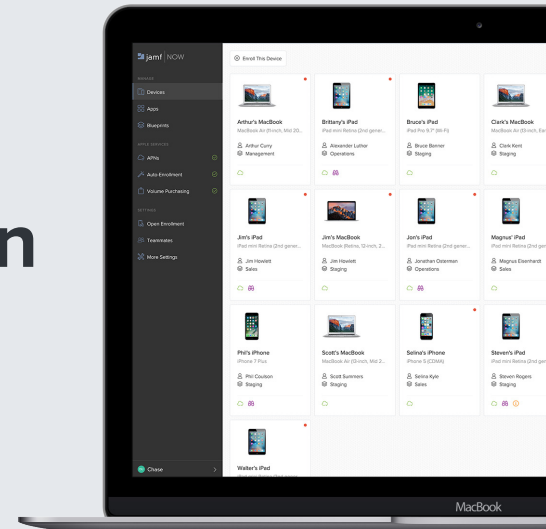

So easy to use IT isn't required

### Efficiency

Use Blueprints to customize a group of devices, deploying specific apps, restrictions and settings

# Jamf Fundamentals Features

The Jamf Fundamentals plan provides enhanced management, core identity elements and cutting-edge security:

## Password Sync

Keep Mac passwords in sync with cloud credentials and enforce password policies from identity providers Microsoft Azure AD and Okta.

## Self Service

This on-demand Mac App catalog provides organization-approved Mac App Store and third-party apps.

## Custom Apps & Profiles

Jamf Now gives you even more flexibility with the ability to deploy custom applications and profiles.

## Malware Prevention

Prevent malicious software, malware and other threats from running on your Mac devices with a “check box and deploy” workflow.

## Automatic Setup

Automate device enrollment to eliminate tedious manual setups and configure Wi-Fi settings and company email accounts.

## Device Inventory

Keep track of device settings with current details and status reports.

## Device Security

If a device is lost or stolen, it can be remotely locked or wiped completely.

## App Distribution

Distribute free apps or ones purchased through Volume Purchasing.

## OS Updates

Manage operating system updates to update a single device or all devices.

## Single App Mode

Lock your supervised iOS or iPadOS device to a single app to focus the device for a specific need.

## Get the Jamf Fundamentals plan

First three devices free • \$4 per device per month • No device minimums
