Release History

Version	Changes
v1.3	<ul style="list-style-type: none"> Fixed an issue that caused slow SIS Importer performance when working with large data files in conjunction with the JSS v9.4 or later.
v1.22	<ul style="list-style-type: none"> Corrected an issue that caused two different capitalization of the same class name to be treated as separate classes. (The second instance of the class would fail to be added to the JSS.) Added compatibility for the new version format used by cloud instances.
v1.21	Fixed an issue that caused imports to fail on cloud instances of the JSS.
v1.2	<ul style="list-style-type: none"> Added the ability to add classes to a site. (requires the JSS v9.12) Added the ability to assign Apple TV devices to a class. (requires the JSS v9.12) Fixed an issue that caused imports to the JSS v9.12 to fail.
v1.1 v	<ul style="list-style-type: none"> Added support for the JSS v9.0 or later. Fixed an issue that caused the SIS Importer to crash if the path to the JSS Conduit contains a space. When deleting existing classes, the JSS Conduit no longer displays an incorrect error message reporting that classes were not deleted successfully. When importing class data from a single text file, the SIS Importer no longer behaves as if class data is being exported from two text files.
