

# Jamf Education Plans

Complete solutions let you deploy management and security together in a bundled breeze.

Create the ideal learning environment with the perfect plan for your needs. Simple, education-purposed management and security that offers admins and staff complete solutions with support to help, every step of the way.

## Jamf Education Enhanced plan

Purpose-built Apple MDM for schools

### Classroom management

Fewer distractions, better learning. Offer total teacher management of all devices with the ability to block apps and web pages— and features such as spell check.

### Comprehensive dashboard

Keep track of managed devices, users and apps. See the status of devices quickly and remediate issues easily.

### Mac and iPad

Manage your Mac and iPad devices with equal ease. Deploying, managing and securing Apple devices with everything users need for success has never been simpler.

### Location Support

Manage each location and its devices, users and groups separately, pushing down profiles and apps from a single location.

Safe connections everywhere students learn

### Network Threat Prevention

Prevent known threats like malicious domains used in phishing attacks using ML:RIAM — our machine learning engine.

### Privacy first, Apple best

Leverage the latest DoH technology available on Apple platforms to prevent harmful content without invading the students privacy.

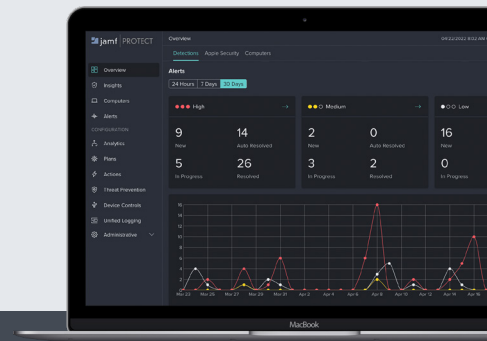

### Content Filtering

Create and customize the level of content control that fits each class to protect against harmful content on the internet.

### Better together

Integration with Apple, Chromebook and Windows devices brings content filtering and security to the whole fleet.

# Elevate Mac security with unmatched protection.

Upgrade to **the Jamf Education Ultimate plan** and add:

## **PROTECT**

Built for Mac, to protect Mac

### Endpoint security

Comprehensive detection and protection for Apple-specific malware and attacks. Data loss can be prevented with device controls to manage removable storage devices.

### Compliance and visibility

Jamf Protect helps organizations with their device compliance goals through customizable benchmark reporting and logging rich telemetry data for comprehensive context into security events.

### Alignment with Apple

Jamf Protect is built with Apple in mind, with consistent same-day support for Apple releases. Security teams can employ a single tool that defends against attacks in the modern security landscape.

### Threat prevention

Extend your known threat prevention capabilities for Mac while Jamf Threat Labs helps threat-hunting teams detect unknown threats.

## **CONNECT**

Reimagine user authentication

### Account provisioning

Jamf Connect gives users the ability to access their Mac and applications with a single identity, without the need for multiple accounts and binding to Active Directory.

### Identity management

Jamf Connect requires a cloud identity, giving IT admins the ability to monitor who is accessing devices, to use cloud admin permissions to service machines, and maintain security and compliance standards.

### Password synchronization

Jamf Connect ensures a user's cloud-identity passwords are synchronized down to the local account level on the Mac, raising security and compliance standards across all devices and users.

**With key identity provider integrations, Jamf Connect is the best way to manage accounts and authentication.**

- Azure
- Google Cloud Identity
- Okta
- IBM Security Verify
- OneLogin
- PingFederate
