

# Jamf Healthcare Implementation Services

EXPERTS DEDICATED TO IMPLEMENTING JAMF PRO & JAMF HEALTHCARE LISTENER

## Ensure your Apple initiative is a success

Jamf Healthcare Implementation Services are for new or existing healthcare customers who need a secure, scalable patient-optimized solution to deploy iPad and Apple TV to patients.

Available in 3 or 6 day service engagements to match your unique needs and budget, Jamf Healthcare Implementation Services complement our legendary customer support to offer onsite expertise delivered by a Jamf specialist to ensure your healthcare implementation is a success from the start.

### WHAT'S INCLUDED?

- Configuration of a standard instance of Jamf Pro
- Integration of Jamf Healthcare Listener to an EMR System (HL7 Interface Spec Pre-Call)
- Workflows to automatically configure and wipe iOS and tvOS devices based on patient status
- In-depth enrollment/deployment planning
  - Includes Apple Business Manager or Apple School Manager enrollments and workflow building assistance
  - Developing a device naming convention and inventory mapping for HL7 ADT workflow
- Training and guidance
  - Training on the Jamf Pro interface for administrators
  - Train-the-trainer work with administrators to work with medical staff on device management
  - Best practice guidance on content and app distribution
  - Part of the engagement can be used to educate frontline teams on the solution (day in the life testing) as well as to provide onsite support for go-live

### NOT INCLUDED

- In depth middleware scripting, clustered deployments and certified Jamf training courses
