4 What's New in This Release

What's New in This Release

This release includes the following bug fixes:

- [PI-005459] Fixed an issue that caused Self Service for macOS to occasionally crash after launching.
- [PI-005481] Fixed an issue that prevented mobile device inventory updates from completing if multiple copies of an app with a version number that contained a numeric segment with a leading zero (e.g., Google Drive version 4.2018.05202) existed in Jamf Pro and were scoped to iOS devices.
- [PI-005505] Fixed an issue that caused significant performance issues in some environments using sites when scoping restricted software records or configuration profiles to computers.

In addition, this release includes the following bug fix from 10.2.1:

- [PI-005434] Fixed an issue that caused significant performance issues in some environments using sites when MDM requests were sent.

For information on the new features, bug fixes, and known issues included in 10.2.0, as well as instructions on upgrading Jamf Pro, see the 10.2.0 Jamf Pro Release Notes.
