Maximize ROI
and Minimize Costs

One centralized solution for efficient Apple management and security.

Today, organizations are under pressure to do more with less. IT and Security teams are no exception, evaluating software needs, their existing tech stack and available resources to identify opportunities for vendor consolidation, integration and other time and cost savings.

To improve operational and budget efficiency, Jamf offers **Trusted Access**: a comprehensive management and security framework providing device management, identity management and secure connectivity with endpoint security, all in one.

Whether you are only just getting started with management or you are looking to expand on a solid foundation of endpoint security, Jamf products integrate seamlessly for an Apple experience that users love and organizations trust.

The Jamf Platform

The Jamf platform is comprehensive, designed for Apple, and includes a range of management, user identity and endpoint security capabilities that are optimized to work together to consolidate up to 6 device management, 3 identity management, and up to 9 endpoint security tools.
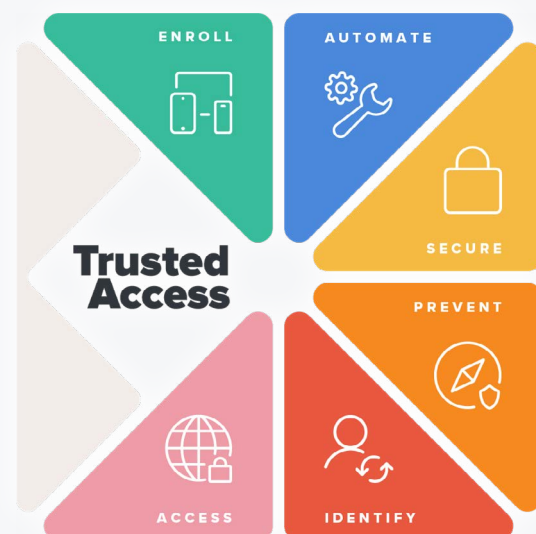

Did you know?

75%   29%

75% of organizations were pursuing security vendor consolidation in 2022, up from **29%** in 2020

29%
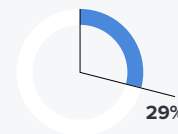

Almost **one third (29%)** of organizations consolidate to reduce spending on licensing
