

# The Jamf Assessment App

Remote proctoring for student progress

## A simple iPadOS app to enable live proctoring of web-based assessment exams.

The Jamf Assessment app provides schools with a simple method to administer remote proctoring for high-stakes exams. Students may take proctored college placement or other high-stakes exams remotely with Jamf Assessment — the app allows live remote proctoring on a student's iPad, ensuring educational progress in any environment.

The Jamf Assessment app allows a proctor to see both a live recording of the screen and video of the student through the camera: meeting high-stakes exam security requirements.

### Features

- Screenshot detection
- Camera enablement
- Custom UI and exam view size
- Custom exam URL

## The Jamf Assessment App:

- **Meets exam security requirements**

Proctors can see the iPad screen, as well as see/hear the student--ensuring adherence to proctoring standards.

- **Is compatible with all modern video conferencing platforms**

Integrate the Jamf Assessment app quickly and easily into your existing tech stack.

- **Is available in Apple School Manager at no charge**

District administrators can quickly and easily get the app from the Apps and Books section of Apple School Manager. It is being provided to schools at no cost.

- **Works with most MDMs, including Jamf Pro and School**

Jamf Assessment requires AppConfig for deployment, which is a feature of most modern MDMs.

## Where can you find it?

The Jamf Assessment app is available for free through Apple School Manager but requires configuration by an Apple administrator. For more information on procuring and configuring the Jamf Assessment app, visit [Jamf Marketplace](#).

## What do I need to get set up?

Jamf Assessment works with Jamf Pro or Jamf School.

## How does it work?

1. Teacher starts a video conference session on their iPad and invites the student. Districts using Jamf School can leverage the Remote Class feature to make this a one-click operation.
2. Student joins the video conference and shares their screen.
3. The student opens the Jamf Assessment app which is preconfigured to show the exam and a camera preview to the left.
4. The test administrator can now see and hear the student, as well as monitor on-screen activity.

## Ready to enable student assessment in any learning environment?

Learn more about the Jamf Assessment app today in the [Jamf Marketplace](#). Begin remotely assessing students in any environment today with Jamf School or Jamf Pro.
