

Jamf Cloud Hosting

Management without the hassle

Jamf Cloud

Have you ever wanted to unload the responsibility of maintaining your Jamf Pro environment? We've got you covered!

As the number of devices in your environment increases, so does the need for scalable, globally available services to manage them. Jamf now offers customers the ability to host your Jamf Pro Server and Jamf Pro services in the Cloud. You handle the inventory, deployment and security of Apple devices in your environment. We'll handle the infrastructure.

And, we'll take on all the responsibilities of managing the whole process of migrating users, groups, performing LDAP integration using our LDAP proxy, and all the little bits involved in getting your cloud migration complete, worry free.

1 Local to Cloud

Migrate your on-premise instance of the Jamf Pro into the Jamf Cloud.

2 Between Servers

Move all your data from an old server (or servers) to a new one.

What's Included

The Jamf Cloud provides everything you need to manage Apple devices in your enterprise.

Jamf Cloud + Jamf Migration Services includes all of the following:

A hosted Jamf Pro Server

All upgrades to the Jamf Pro Server

99.9% uptime and 24/7 availability

Exporting all of your data and bringing it into the new Jamf Pro Server environment

30 days of secure backups

Migration project management

Public, trusted certificates

Expectations meeting

Migrating between two of your own servers

There are a lot of things, such as databases and certificates, that need to be moved when setting up a new Jamf Pro Server. And, if something goes wrong, you may have to re-enroll your devices.

Don't want the headaches? Jamf Professional Services can help you migrate between two of your servers. Our engineering team does this kind of thing all day, every day. We are prepared to take care of everything on your behalf to ensure your migration goes smoothly.
