

Become a Jamf Educator

Jamf Educator is a custom-built platform for educators and those responsible for educational technology. Learn about the Jamf Teacher app in a practical simulation environment without needing to set it up in your live environment. It has two tracks: Ed Tech and Educator. Our self-paced learning journey provides you with the knowledge, skills and confidence to implement and use the Jamf Teacher app. This app enhances classroom communication and workflows and helps your school succeed with Apple. Once complete, take a short quiz to gain your Jamf Educator badge and professional development certificates.

Learning tracks for both educators and education technologists

Educator

Learn how Jamf Teacher provides educators with simple yet powerful tools to enhance learning using Apple devices. From creating a lesson to student interactions, we take you step by step.

Ed Tech

Learn how education technologists can help deliver and facilitate Jamf Teacher in their schools with resources that assist in leading a professional development day for teachers.

Education and Jamf

First, learn about the promises and pitfalls of using technology in the classroom. Next, take a tour of the Jamf Teacher App and see how it interacts with other classroom management apps. Finally, discover how to get your official Jamf Educator badge!

Differentiation

One of the biggest challenges for teachers is offering students instruction that meets their needs. Explore how to use Classes and Lessons in Jamf Teacher to deliver an individualized experience.

Classroom management

Learn how to help with the ever-challenging task of classroom management in an age of 'always-on' devices with Classes and Lessons in Jamf Teacher.

Student interaction

We'll dive into facilitating meaningful discussions and effective student-teacher interactions with the Messages and Raise Hand features of Jamf Teacher.
