

Jamf Pro

Sub-processors

Jamf may engage vendors to provide services on our behalf. Any vendor who may process Customer Content, as defined in Jamf’s [Software License and Services Agreement \(SLASA\)](#), are considered sub-processors and are disclosed below. As set forth in Jamf’s [Data Processing Agreement \(DPA\)](#), Jamf has adequate data transfer mechanisms in place with each sub-processor.

Sub-processor	Location(s) of processing	Purpose of processing
Amazon Web Services	Australia, Germany, Japan, United Kingdom, United States	Cloud hosting

* The countries listed are the sub-processor’s locations from which this Jamf product is made available. Customers may choose the specific location in which they would like the product hosted.

Jamf may use additional sub-processors for customer support – see the sub-processor listing for Jamf Support.

Changes to this sub-processor list will be communicated to all customers.
