Jamf Threat Defense
Sub-processors

Jamf may engage vendors to provide services on our behalf. Any vendor who may process Customer Content, as defined in Jamf's Software License and Services Agreement (SLASA), are considered sub-processors and are disclosed below. As set forth in Jamf's Data Processing Agreement (DPA), Jamf has adequate data transfer mechanisms in place with each sub-processor.

Sub-processor	Location(s) of processing*	Purpose of processing
Amazon Web Service	Ireland	Cloud hosting (core services)
Amazon Web Service	Australia, Brazil, Canada, France, Germany, Hong Kong, India, Ireland, Italy, Japan, Singapore, South Africa, South Korea, Sweden, United Kingdom, United States	Regional edge services
Deutsche Telekom (T-Systems)	Germany	Regional edge services
Google Cloud Platform	Belgium, Spain, Netherlands, United States	Regional edge services
Mailchimp	United States	Email notifications
Microsoft Azure	Switzerland, Norway	Regional edge services
Rackspace	United Kingdom, United States	Regional edge services
Tableau	Ireland	Ad-hoc requests by customers for reports
Twilio	United States	Email notifications

* The countries listed for regional edge services are dynamically chosen based on proximity to the endpoint.

Jamf may use additional sub-processors for customer support – see the sub-processor listing for Jamf Support.

Changes to this sub-processor list will be communicated to all customers.
